Quarterly Regional Statistics ◆ First Quarter 2003

This issue

No changes have been made to the layout of *Quarterly Regional Statistics* since the last issue.

Table 2, **economic structure**, is based on Statistics Canada's business register as of December 2002.

Table 4, retail sales, covers the same period as the previous issue but the data has been updated.

Table 5, **manufacturing principal statistics**, reflects revised data but 1997 is the end of the road for sub-provincial SIC80–based data. We are working with the 1998 NAICS-based sub-provincial data but cannot tie it back to the old series – even for total manufacturing. Again you should keep the table from this issue for future reference.

Regional boundaries

The geographic basis of this document is the 1996 Census geography.

More Regional Data

Our Internet site includes a general search tool and screens providing a subject matter search as well as a geographic search tool (**Regions**). The regions pages provide a more intuitive access to the many maps that we have on-line. With these changes users can more easily locate our small area data offerings.

We have updated our regional **Socio-Economic Profiles and Indices** available freely on our Internet site. These regional profiles represent a significant resource for researchers, policy makers, investors and students. They are complemented by another product - 1996 **Census Profiles**. These are also freely available on our web site. Each consists of a cover, 3 pages of comparative charts and tables, and a 2-page data supplement. There are 457 profiles to choose from, one for each census division (regional district), incorporated municipality, sub-regional district and Indian Reserve.

http://www.made-in-bc.ca

Our Internet site for the **British Columbia Manufacturers' Directory** is now up and running. This free site opens up many opportunities to Internet users and the listed firms. You can search for a particular firm, filter the database to all firms meeting your criteria, send us an update of your current listing or a new listing, or place an order for the book or database.

There are several geographic fields which means you can easily generate a list of firms in a specific area. The Advanced Search allows you to combine search criteria giving powerful tools to more sophisticated users.

General — Regional Data Products from *BC STATS*

Census Profile *(Every 5 Years)*

There are a range of similar products for different Censuses and geographies. Six-page profile for 457 Census Sub-Divisions (1996), one-page profile for Provincial Electoral Districts (1996 - revised and old boundaries, 1991). Graphic presentation, some with tables. On our Web site for free access — see **Regions**. Updated with each Census.

Regional and Community Facts *(Semi-Annual)*

A two- page compendium of statistics including: population; selected Census characteristics; residential property assessment summary; building permits; personal taxation; BC Benefits recipients; E.I. beneficiaries; incorporations; and bankruptcies. Annual data, two pages per region or community. On our Web site for free access — see **Regions**. Updated two times a year.

Community Profiles *(Always Current)*

A series of looseleaf binders, each devoted to one of 28 regional districts, featuring the broadest range of regional data. Some maps and charts. 200+ to 400+ pages per regional district with most data provided for all communities in each region. Annual data maintained so that purchaser gets latest available information.

Socio-Economic Statistical Profiles AND Indices *(Annual)*

A single looseleaf binder, organized by region and providing socio-economic information such as age, ethnic origin, migration, social assistance recipients, crime, education, child care, health, income and labour market activity. Maps, charts and tables. Complete data tables provided in the appendix. Regional Districts and Local Health Areas. Updated annually. Latest edition: April 2002. Free on our Web site.

Quarterly Regional Statistics *(Quarterly)*

A single release, organized by region, featuring current monthly and quarterly economic data to provide an up to date measurement of local activity compared to that of the province. Text, charts and tables. Approximately 240 pages. Released quarterly. Available in BC STATS WebStore at www.bcstats.gov.bc.ca.

Regional Index *(Published Every Five Years – 1996 Census version not available)*

A comprehensive, narrative and statistical examination of the geographic, economic and social structure of B.C.'s eight development regions and 73 sub-areas. Updated every 5 years to take advantage of the most recent Census of Population and Housing. Last released in March 1995. There are tentative plans to update this publication with a Web-enabled edition.

Single Topic Regional Data Products from *BC STATS*

Regional District Population Projection *(Annual)*

This 25-year forecast projects the composition of the population in each regional district. Detailed statistical tables provide historical and forecast population by age and sex, including components of change. For topical articles and methodology ask about the *B.C. Population Forecast* publication. Available on paper or PDF file. Updated annually. Available in WebStore at www.bcstats.gov.bc.ca.

Local Health Area Population Projection *(Annual)*

This 25-year forecast projects the composition of the population in each local health area. Detailed statistical tables provide historical and forecast population by age and sex, including components of change. For topical articles and methodology ask about the *B.C. Population Forecast* publication. Available on paper or PDF file. Updated annually. Available in Webstore at www.bcstats.gov.bc.ca.

Manufacturers' Directory *(Annual)*

Lists B.C. manufacturers by company name (detailed listing), industry, product, and regional district by community. This publication details 5,000 manufacturers including employment size, commodities produced, export status and a contact name and address. Available in print, as a CSV file on diskette, or searchable free Web-enabled version at www.made-in-bc.ca.

Major Projects Inventory *(Quarterly)*

Information on major capital projects, listed by development region and status (proposed, under construction, on hold or completed). Includes brief regional profiles and maps. Updated quarterly.

Tourism Sector Monitor (formerly Tourism Room Revenue) *(Monthly)*

A monthly release, available by subscription, with estimates of revenues received from room rental by type of accommodation, with a geographic breakdown by development region, regional district and selected urban areas. Seasonally adjusted estimates are provided for development region totals and for accommodation type totals. Approximately 16 pages per month. Available in Webstore.

BC STATS

Ministry of Finance and Corporate Relations

1 General Economy

Although the services sector is the largest component of British Columbia's economy (as measured by the Gross Domestic Product), the Province is still heavily dependent on natural resource industries. When inter-industry linkages are taken into account, the resource sector is still responsible for at least one quarter of the jobs in British Columbia. Forest-based industries form the most important segment of the Provincial economy. Virtually every community in the province relies to some degree on the industry. Of all manufacturing industries in B.C., wood industries rank first, followed closely by the paper and allied industries. These two industries combined account for almost one half of all manufacturing in British Columbia. Mining is another important resource industry for British Columbia. Coal mining is the most significant activity in the East Kootenay Region, and oil and gas exploration is the major economic driver of the Peace River and Northern Rockies Regions. In addition, there are a significant number of metal mines in the Province. Copper is by far the most important metal mined in British Columbia. Metal manufacturing is a significant activity for some communities, particularly Trail and Kitimat where there are large lead-zinc and aluminum smelters respectively. Other significant resource industries are agriculture and fishing. Agriculture in B.C. is very diverse, ranging from cattle ranching, to dairy, to poultry, to fruit orchards, to wine grapes. Most of the agricultural activity is located in the southern regions of the Province, primarily around the Okanagan and the Kootenays. Fishing is more predominant in Northern B.C., around Prince Rupert, and the north of Vancouver Island. The fish canning industry is concentrated mainly in Vancouver, Richmond and Prince Rupert. Tourism is also an important economic driver for B.C. It accounts for about 4.8 per cent of the Provincial Gross Domestic Product, which is slightly more than the direct contribution of the mining industry. The Lower Mainland and Vancouver Island-Coast Regions account for more than half of travel expenditures, and Vancouver and Victoria are among the top 20 travel destinations in the world.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

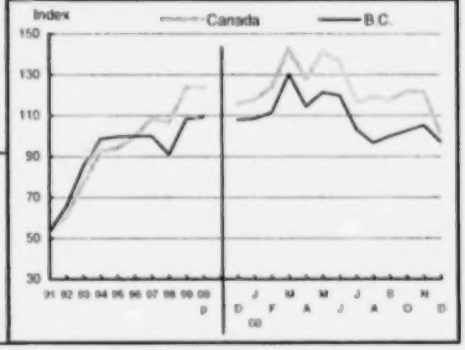
Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, published and unpublished editions of 31-203; and CANSIM for recent annual & monthly shipments - see appendix
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

British Columbia

13 Demographics

The British Columbia population is getting larger and older. The major factor driving population growth is migration to British Columbia. The ageing of the population is caused by a long-term historical decline in fertility rates. The baby boom that occurred between the end of World War II and the mid-sixties helped delay the onset of the full effect of this ageing. As these "boomers" reach retirement age, the ageing of the population will accelerate. As the population ages, the rate of natural increase will fall, which means that migration will become an even greater part of population growth in the future.

14 Projection

Interprovincial migration levels have fallen substantially after several years of extremely large inflows. The provincial share of international migration has increased over the last few years and the higher levels are expected to be maintained for at least the short-term. As a result, population growth should persist, despite the drop in interprovincial migration.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

Vancouver Island/Coast
Development Region

1 **General Economy**

Regional Districts in Development Region: Capital, Cowichan Valley, Nanaimo, Alberni-Clayoquot, Comox-Strathcona, Powell River, Mount Waddington, Central Coast

Outside of the Capital region, forestry is by far the dominant economic activity in this region. In some areas, fishing is as important as the forest sector, but on the whole, the forest sector is what drives the economy. Within the Capital region, the public sector and services related to tourism and retirement are the main economic drivers. Being the provincial capital means that Victoria has a large government sector.

Since the forest sector is so important to this region's economy, developments in forestry will have significant effects on the population of the region. Many of the Timber Supply Areas and Tree Farm Licenses in this region are experiencing reductions to the Allowable Annual Cut. The Clayoquot Sound area is one of the more publicised reductions, but there are other areas that have also experienced cuts to the timber supply in the form of AAC reductions. These reductions could lead to job loss, particularly if alternative fibre sources cannot be found and processing facilities in the region are forced to shut down.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

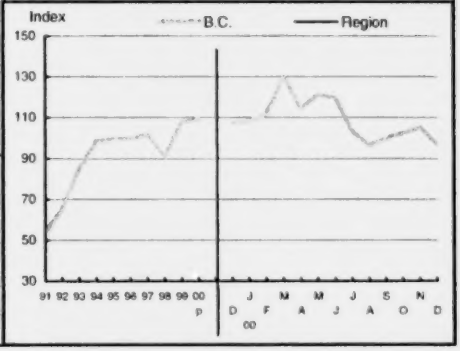
Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details.

Vancouver Island/Coast
Development Region

13 Demographics

There are several retirement communities located in this region such as in the Victoria and Qualicum areas, and this is likely why the median age of the population is higher than the provincial median. This is reflected in the elderly dependency ratio (i.e., the ratio of those aged 65 and over to those aged 18 to 64), which is higher than the provincial ratio. Also, the gender ratio is biased in favour of females, even more so than for the province as a whole, and this may also be due to the older population (i.e., since women tend to live longer than men).

14 Projection

The natural increase (i.e., the excess of births over deaths) in this region is continuing to decline, having become negative just recently; however, net migration to the region is expected to remain at high levels, which will more than compensate for population losses due to deaths. As a result, this region will continue to experience strong population growth over the projection period.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

Mainland/Southwest
Development Region

1 General Economy

Regional Districts in Development Region: Greater Vancouver, Fraser Valley, Sunshine Coast, Squamish-Lillooet

This region encompasses the economic heart of the province. The Greater Vancouver region has an extensive manufacturing, trade and service base and many of the areas surrounding Vancouver depend on its economic activities. In the regions furthest from Vancouver, forestry and agriculture are the main economic drivers. Tourism is also gaining in importance, particularly in the Whistler area.

The municipalities of the Greater Vancouver Regional District (GVRD) have come to an agreement on a Livable Region Strategic Plan. This plan designates a "Growth Concentration Area" where infrastructure such as rapid transit will be put into place to accommodate increased growth. The plan will affect the growth patterns and the distribution of the population within the region.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

Mainland/Southwest
Development Region

13 Demographics

This region comprises well over half the provincial population, despite being the smallest in terms of land mass. As a result, the demographic characteristics of the region's population are similar to those of British Columbia as a whole.

This region receives close to 90 per cent of immigrants moving to British Columbia, and over half of all interprovincial in-migrants. As a result, when the province experiences high levels of in-migration, this region also experiences population growth.

14 Projection

It is expected that migration to British Columbia, both from international and interprovincial sources, will remain high throughout most of the projection period, although for interprovincial migration, at least, the levels will be much less than those experienced in the last few years, and in the short-term there will be net outflows of interprovincial migrants. Slow downs in the province's resource sector will likely result in increased migration from the periphery to the core in the short-term. As a result of the substantial inflows of migrants, this region will continue to experience strong population growth.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

1 General Economy

Regional Districts in Development Region: Okanagan-Similkameen, Thompson-Nicola, Central Okanagan, North Okanagan, Columbia-Shuswap

The main economic drivers in this region are forestry, tourism and agriculture. This region contains the most productive agricultural areas within the province. The climate of the area, which is so conducive to agriculture, also draws a large number of tourists and retirees to the region. Mining is also an important industry, particularly in the Kamloops area, where the largest mine in the province, the Highland Valley Mines, is located.

Developments in the resource sectors will affect the population flows to and from this region. Several major mines have closed in this region in the last few years due either to ore depletion or poor metal prices. Although the impact of these closures on a regional basis will probably be small, the local impacts could be significant. The Highland Valley Mines is projected to close sometime around 2008 and will have the most significant impact in terms of job loss and population movement.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

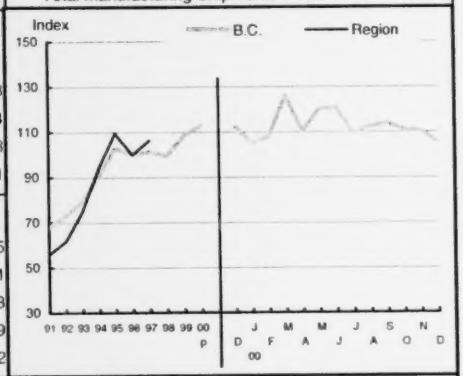
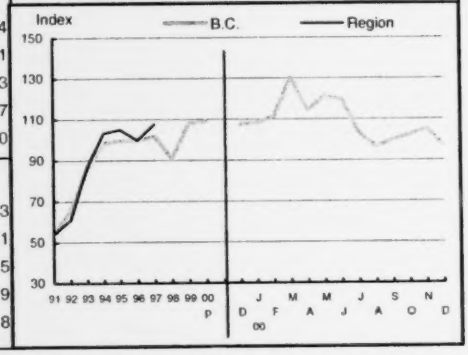
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

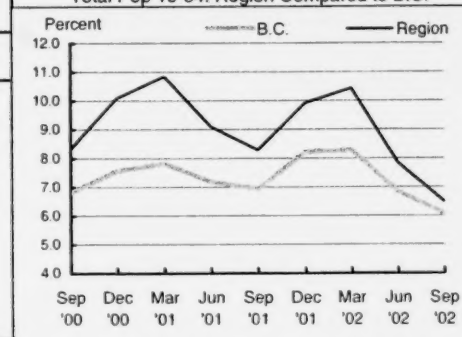
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Thompson/Okanagan
Development Region

13 Demographics

This region experienced net outflows of migrants during the mid-eighties, probably due to the downturn in the forest sector at that time. In-migration has been high until the last few years, contributing to strong population growth for the region. The median age of the population in this region is higher than the provincial median, probably due to the substantial number of retirees located in the region. The proportion of elderly (aged 65 and over) to working age population (aged 18 to 64) is also higher than the provincial ratio.

14 Projection

The net migration inflows to this region will likely remain relatively low for the short-term, but should grow throughout the projection period. The natural increase (i.e., the excess of births over deaths) is falling, and this trend will likely continue, becoming negative in the next couple of years. However, the strong inflows of migrants will likely more than compensate for any losses due to increased deaths and this region is expected to experience strong population growth.

15 Selected Demographic Characteristics

Kootenay
Development Region

1 General Economy

Regional Districts in Development Region: East Kootenay, Central Kootenay, Kootenay-Boundary

Mining and forestry are the main economic drivers in this region. The East Kootenay region is one of the main centres of British Columbia's coal industry with five major coal mines located there. The Cominco Smelter at Trail is a major employer in that area and construction related to hydroelectric projects is another important source of employment.

The closure of the Sullivan Mine in Kimberley and slow down in the forestry sector will likely mean that the recent out-migration will continue for the near future. Depletion of reserves could reduce the amount of growth over the long-term, although the area has good potential for new discoveries.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

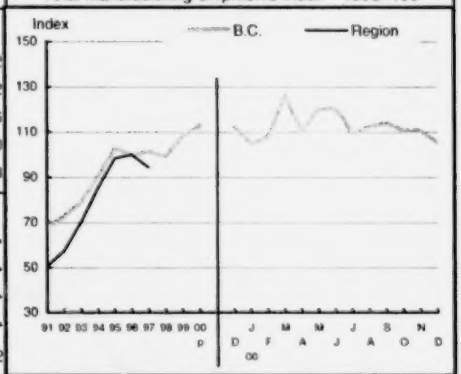
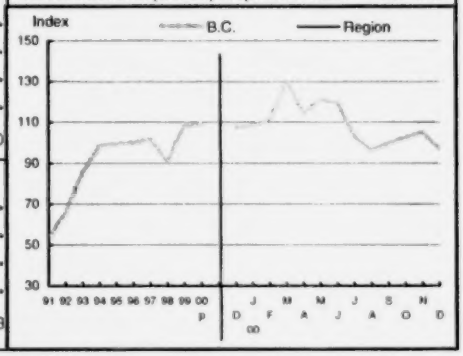
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

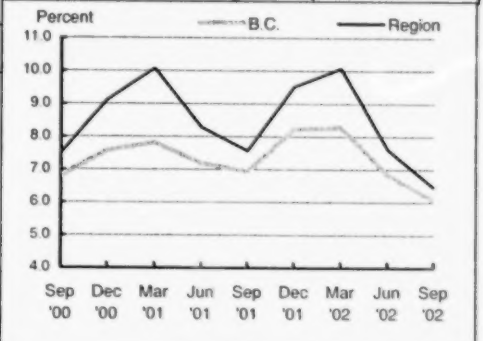
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Kootenay
Development Region

13 Demographics

The dependence on the male-dominated jobs in the resource sectors is likely the reason for a gender ratio weighted in favour of males in this region, in contrast to the province as a whole, which has more females than males. Cutbacks in the mining sector and the mobility of construction workers have resulted in an age structure that is somewhat different than the provincial average. Those workers who move are more likely to be young and single, leaving behind more mature couples with families. As a result, the median age is higher than the provincial median as is the elderly dependency ratio.

14 Projection

The natural increase (i.e., excess of births over deaths) for this region will likely become negative within the next few years, but a tendency towards positive net migration should result in overall population growth until nearly the end of the projection period.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total	
1976	10.0	32.0	16.6	33.8	26.3	11.7	130.3	42.6	0.547	0.152	0.699	1976

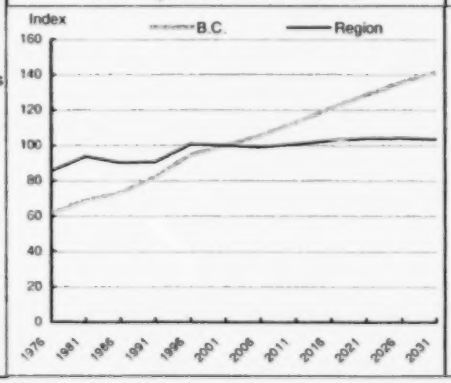
Age groups reflect pre-school, school, advanced education, family formation, mature workers and retired.

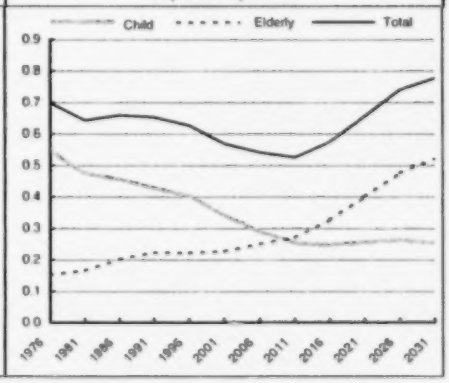
Child Dependency:
(ages 0-17) / (ages 18-64)

Elderly Dependency:
(ages 65+) / (ages 18-64)

Total Population Index 1996=100



Dependency Ratios



Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Regional Districts in Development Region: Cariboo, Fraser-Fort George

Forestry is by far the main economic driver for this region, but tourism, agriculture and mining also play important roles in the economy. Prince George is the main service centre of the northern interior of the province and the service sector is particularly important to the city's economy. The agriculture sector is comprised primarily of cattle ranching and mixed farming activities. The only remaining mine closed 2001, but the potential exists for new ones to come on line within the next couple of years. Several mines have closed in the last couple of years due to low metal prices.

Developments in the forest sector will likely drive growth in this region in the future. The region is home to a large number of pulp mills and sawmills and it is crucial that the timber supply to the region is sustained if it is to maintain its job base in the forest sector. There have been some mill closures over the last year that have had significant employment impacts.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

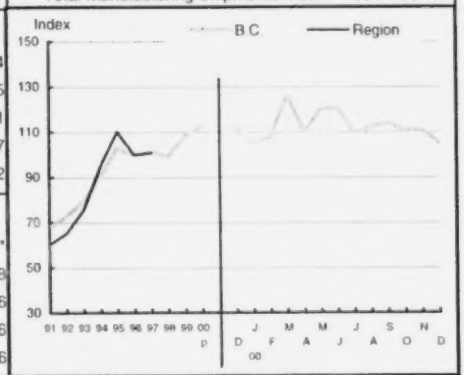
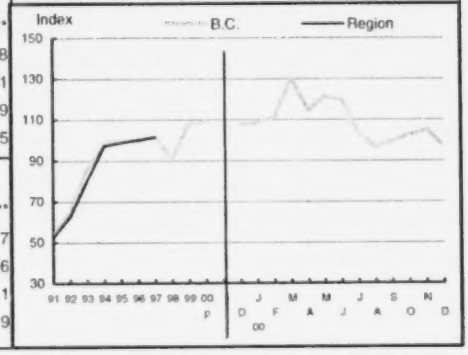
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

6 Building Permits

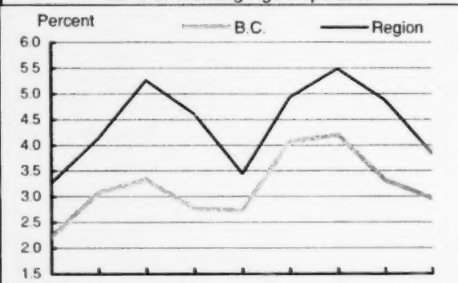
EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996. - Data too small to release.

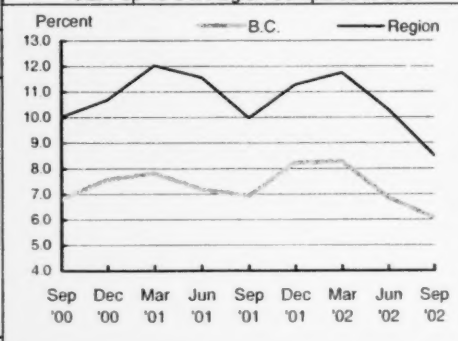
Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Cariboo
Development Region

13 Demographics

The reliance on the male-dominated employment of the forest sector is likely the explanation for the heavy weighting of the gender ratio in favour of males in this region, in contrast to the province as a whole, which has more women than men. The median age of the population is lower than the provincial median and this is reflected in a higher proportion of children in the population and a lower proportion of elderly.

14 Projection

This region should continue to have out-migration for the next couple of years. A general trend towards recovery in the resource sector will likely led to increased in-migration. Natural increase is expected to become negative in the last decade of the projection period. Overall though, the population of the area should increase by over twenty thousand people during the next thirty years.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

1 General Economy

Regional Districts in Development Region: Skeena-Queen Charlotte, Kitimat-Stikine

Forestry, mining, tourism and fishing are all important economic drivers in this region. There is currently only one major mine still operating in the region (Eskay Creek) as the Snip mine closed in the spring of 1999. However, there is potential for several other mineral projects. In addition, mineral processing at the Alcan aluminum smelter at Kitimat provides a significant amount of employment. The Prince Rupert area has the largest concentration of fish processing facilities in the province outside the Vancouver area.

Major developments that will affect this region include the recent land claims settlement with the Nisga'a; the possibility of new mines opening in the near future; the possibility of further restrictions being imposed on the fishing industry in order to avoid depletion of salmon stocks; the possibility of a new aluminum smelter at Kitimat.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

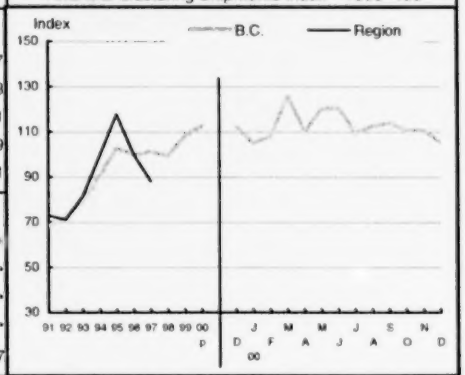
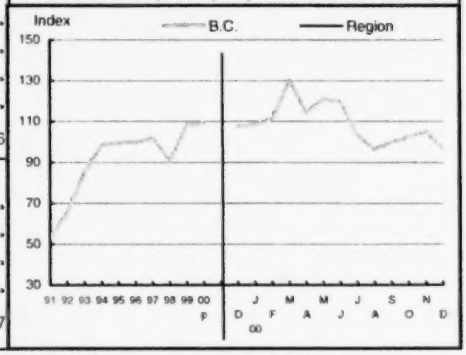
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996.

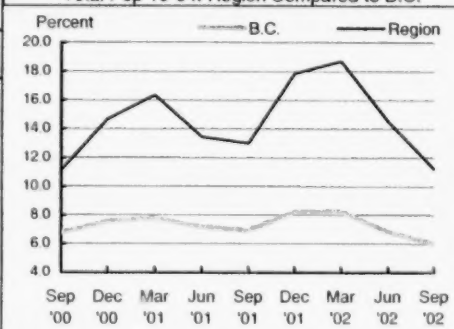
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



North Coast
Development Region

13 Demographics

The median age of the population in this region is substantially younger than the provincial median. There are proportionately more children and less elderly in the population compared to the province as a whole. The total fertility rate is substantially higher than the provincial rate, which partially contributes to the greater proportion of children. Due to the dependence on the male-dominated employment of the resource sectors, the gender ratio is biased in favour of males, in contrast to the province as a whole, which has more women than men.

14 Projection

This region has tended to have more net migration outflows than inflows, but new economic opportunities that will be developing over the next couple of decades may reverse this trend towards net inflows through most of the projection period. With the youthful population, the natural increase (i.e., the excess of births over deaths) will remain relatively high, which will result in an overall tendency of population growth for this region.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

Nechako
Development Region

1 General Economy

Regional Districts in Development Region: Bulkley-Nechako, Stikine

Forestry, tourism, mining and agriculture are the main economic drivers in this region. Several major mines in this region have shut down in recent years; however, there is a great deal of potential for other mineral deposits to be exploited and new mines may be constructed over the next few years. Endako employees over 200 people. The Huckleberry Copper mine opened in 1997 and has an expected 16 year life. The increase in the AAC for the Cassiar TSA in 1996 did not precipitate population increases. In 2002, the AAC was reduced by one quarter.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

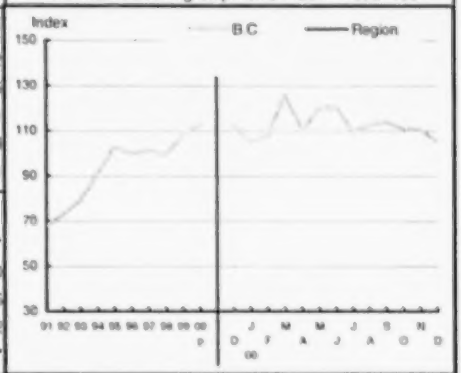
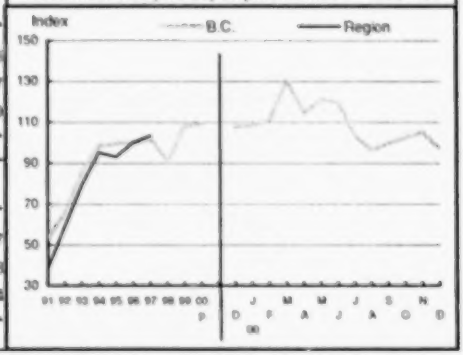
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

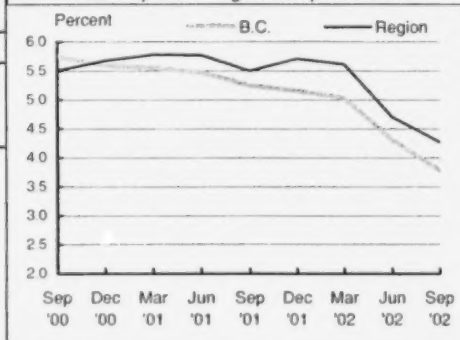
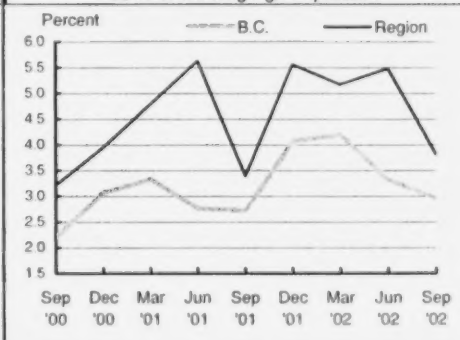
<1 Year	44.5	33.3
1-2 Years	19.4	18.9
>2 Years	36.1	47.8

All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996.

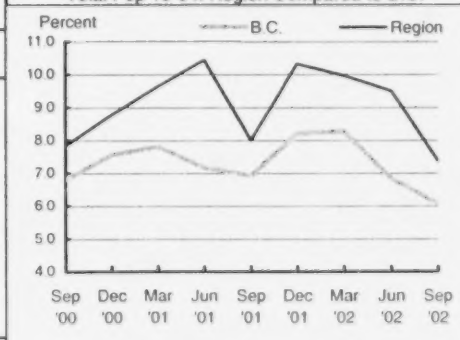
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

Nechako
Development Region

13 Demographics

The median age of the population of this region is substantially lower than the provincial median and the ratio of children (aged 17 and under) to working age population (aged 18 to 64) is also substantially higher in this region compared to the province as a whole. The total fertility rate is one of the reasons for the youthful population, since it is also much higher than the provincial rate. The remoteness of a large portion of the region is likely another reason, since the elderly tend not to live in areas that are distant from medical facilities and other services. The gender ratio is heavily weighted in favour of males, in contrast to the province as a whole, which has more females than males. This is likely due to the nature of the economic activities in the region.

14 Projection

A large portion of this region is very sparsely populated. Net migration to the area has been negative in recent years and this trend should continue for the next few years. The region should experience small net inflows with the recoveries expected in the resource sector in the latter half of this decade. Combined with a positive natural increase (i.e. the excess of births over deaths), the population should grow modestly over the projection period.

15 Selected Demographic Characteristics

1 General Economy

Regional Districts in Development Region: Peace River, Northern Rockies

The economy of this region is fairly diversified, with coal mining, oil and gas exploration, forestry, tourism and agriculture all having significant impacts on the economy. The North-eastern region of the province is a significant producer of oil and gas, and exploration in this sector has and will continue to employ a large number of people. Two new coal mines are scheduled to open in the next few yews.

Quintette coal mine closed in August, 2000 and the same fate will likely be repeated for the Bullmoose coal mine in 2003. There have already been some population impacts from the layoffs and more are certain to follow. Also, the building of an OSB mill has been put on hold. On the positive side, two new coal mines are expected to open in 2004-2005..

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

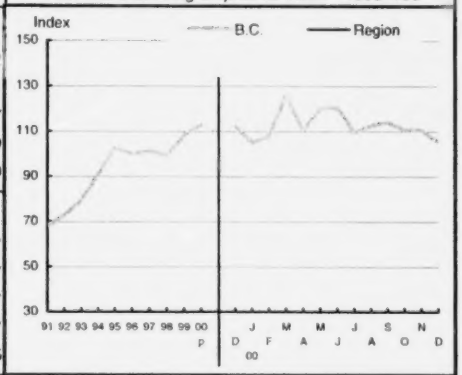
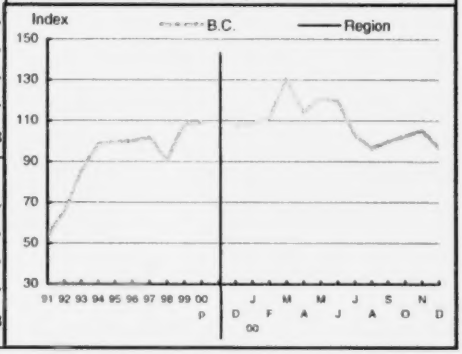
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Source: Office of the Superintendent of Bankruptcy, Government of Canada
Total bankruptcy index includes business and consumer bankruptcies.

Note: Bankruptcy is not a good measure of business failure. Most firms that fail wind down operations and withdraw from business.

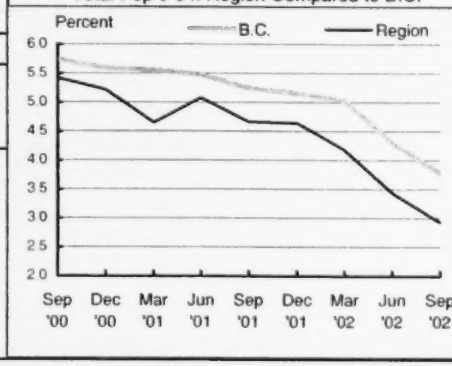
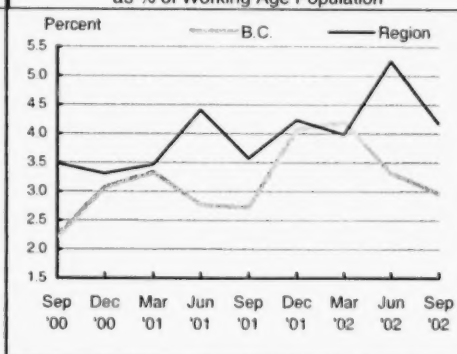
All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996.

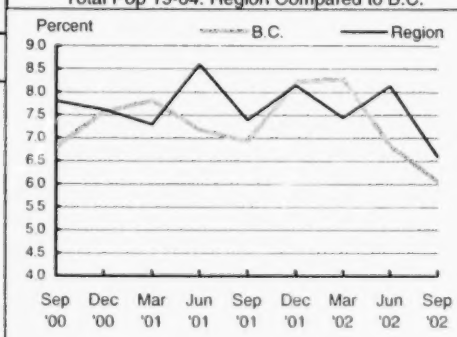
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Northeast
Development Region

13 Demographics

The remoteness of the area is probably the reason for a median age that is substantially lower than the provincial median. The total fertility rate is also much higher than the provincial rate, which also contributes to a younger age structure. The ratio of children (aged 17 and under) to working age population (aged 18 to 64) is much higher than the corresponding provincial ratio. Conversely, the ratio of elderly (aged 65 and over) to working age population is lower than the provincial ratio. Due to the dependence on the male-dominated resource industries, the gender ratio is heavily weighted in favour of males, in contrast to the province as a whole, which has more females than males.

14 Projection

The developments in the mining, oil and gas sector should lead to population inflows for this region. There is a lot of growth potential due to the abundance of natural resources located in the area and this should translate into strong population growth over the long-term. However, there will be some outflows in the short-term due to the layoffs in forestry and mines.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Port Alberni, Tofino, Ucluelet

Forestry is the primary economic activity in this region, and as a result, the area is vulnerable to fluctuations in this sector. Fishing is another important resource-based industry in the region. The resource-based sectors have been experiencing supply problems in recent years, which has precipitated a push for growth in the tourism sector.

Reductions to the Allowable Annual Cut have reduced employment in harvesting and there have also been cutbacks at local mills. In the fishing industry, low levels of fish stocks have lead to restrictions on the size of the catch and the length of the fishing season, which could seriously affect the industry. On the positive side, projects in the tourism sector like the Reef Point resort at Ucluelet should help mitigate some of the effects of the downturn in the resource sectors.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

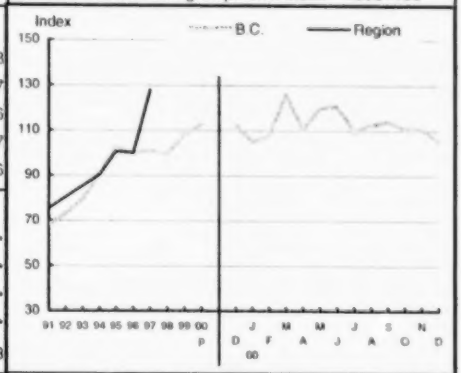
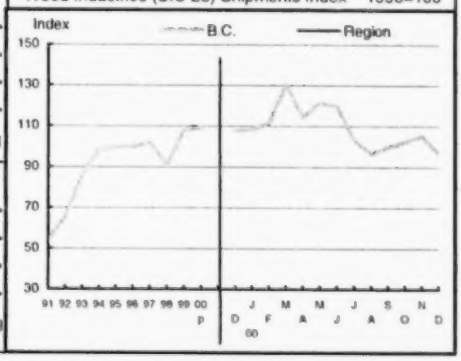
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Source: Office of the Superintendent of Bankruptcy, Government of Canada
Total bankruptcy index includes business and consumer bankruptcies.

Note: Bankruptcy is not a good measure of business failure. Most firms that fail wind down operations and withdraw from business.

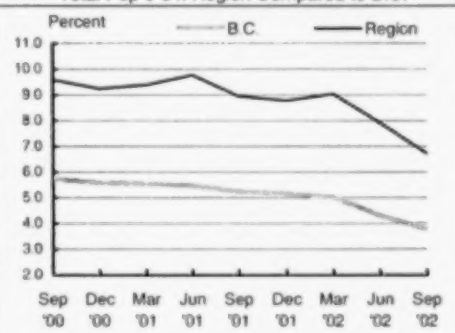
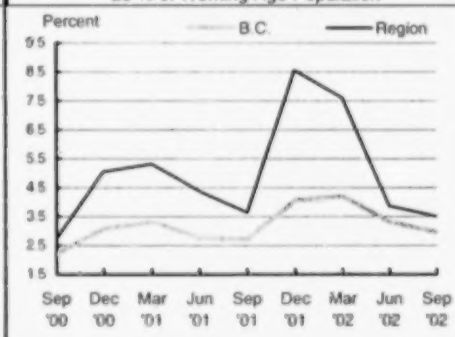
All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996. - Data too small to release.

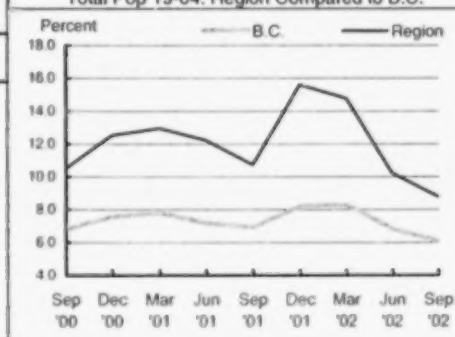
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Alberni-Clayoquot
Regional District

13 Demographics

This region has generally been a net loser of migrants and the trend is expected to continue as the economy is transformed from resource-based industries to more service-oriented industries. The gender ratio for this region is weighted in favour of males, in contrast to the province as a whole, which has more females than males. This is likely due to the nature of the economy and the dependence on resource-based employment, which tends to be male-dominated. The proportion of elderly people (over 65 years of age) has been gradually increasing and should match the provincial average in the next few years.

14 Projection

It is projected that the traditional net migration outflows for this area will continue, particularly as constraints in the resource sectors reduce the employment base. Although there are plans to further develop the tourist industry and to attract more retirees to the region, the number of jobs in the service sector supported by these activities is less than those supported by the forest sector. This means that it will take more than one tourism job to achieve the same spin-off benefits of one forest job. These conditions should result in a decline in population for the area.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

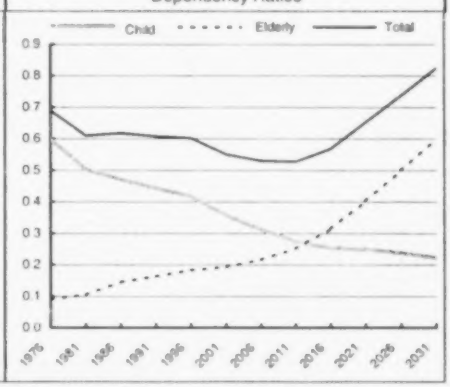
Dependency Ratios



Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Burns Lake, Fort St. James, Fraser Lake, Granisle, Houston, Smithers, Telkwa, Vanderhoof

Forestry, tourism, mining and agriculture are the main economic drivers for this region. The agriculture industry in this region consists mainly of grain production. There are currently two major mines operating in the area (Endako Molybdenum Mine and Huckleberry Copper Mine). Smithers is also one of the major supply and service points for mineral exploration and development in northern British Columbia and miners working in fly-in operations are often based there.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca

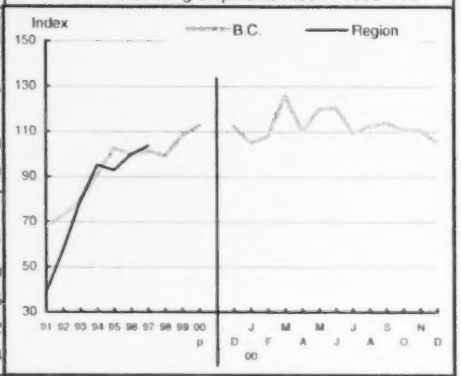
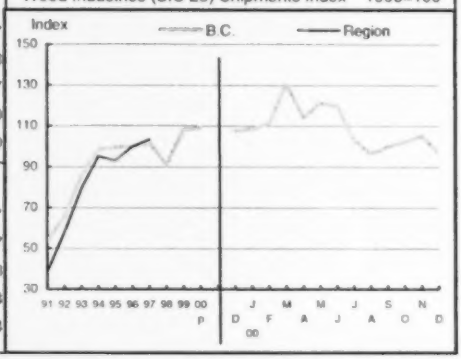
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

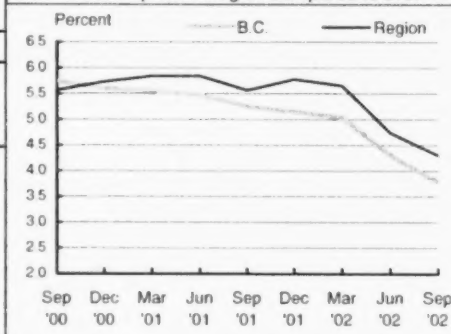
All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996.

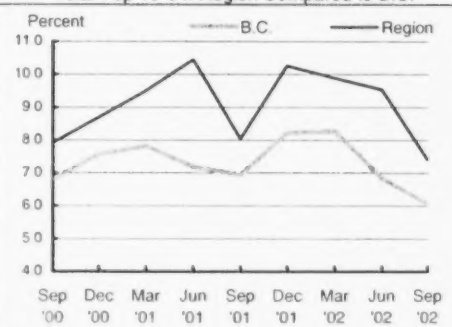
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Bulkley-Nechako
Regional District

13 Demographics

Due to the dependence on the male-dominated professions in the resource sectors, the gender ratio of this area is heavily weighted in favour of males. This contrasts with the province as a whole, which has more females than males.

The total fertility rate for this area is much higher than the provincial rate. This is likely one of the reasons for the higher ratio of children (aged 17 and under) to working age population (aged 18 to 64) compared to the province as a whole. Conversely, the ratio of elderly (aged 65 and over) to working age population is lower than the provincial ratio. As a result, the median age of the population is substantially younger than the provincial median.

14 Projection

This region is expected to receive net inflows of migrants throughout most of the projection, with the exception of outflows in the short-term due to forestry sector job losses. The natural increase (the excess of births over deaths) for this area is expected to be relatively high and positive over the duration of the projection period, and in combination with positive net migration should result in overall population growth for this area.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

Capital
Regional District

1 General Economy

Municipalities in Regional District: Central Saanich, Colwood, Esquimalt, Highlands, Langford, Metchosin, North Saanich, Oak Bay, Saanich, Sidney, Sooke, Victoria, View Royal

Being the provincial capital means that Victoria has a large public service sector. The pleasant climate of the area also makes it a popular tourist destination and retirement area. The abundance of retirees makes pension and investment income important elements of the economy. This, in combination with a large and growing tourism trade, helps to drive the service sector.

Major developments that could affect this area include the recent construction of sewer lines and the improved transportation networks to the Sooke area. These developments could be an indication that the Sooke area may be ready for more serious development.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

13 Demographics

The urban nature of much of the region means that the population density is much greater than the provincial average. The median age of the area's population is higher than the provincial median, likely due in part to the areas attractiveness for retirees.

The larger percentage of elderly people affects other demographic variables as well. For example, the gender ratio is weighted much more in favour of females than is the case for British Columbia as a whole, since females tend to live longer than males.

14 Projection

The retirement communities in Greater Victoria and the Gulf Islands should continue to grow as the provincial population ages and more people chose to retire in these areas. As Greater Victoria reaches saturation, growth will likely move into Saanich and Sooke. The Gulf Islands' "Island Trust" exists to ensure that the Islands maintain their island character and this control over development will likely keep growth on the Islands to a minimum.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

1 General Economy

Municipalities in Regional District: Quesnel, Williams Lake, 100 Mile House, Well

Forestry is the main economic driver for this region, but tourism, cattle ranching important roles in the economy. The only remaining major mine in the area shut dow two others had closed in the last few years. The Quesnel River gold mine opened in down in March 1998 due to low metal prices. The Gibraltar mine near Williams Lake 1999 due to low ore grades and low prices. The Mount Polley mine near Likely, whic 1997 was expected to have about a 14-year life, but low prices stopped operations. Gold/Copper Mine has the potential to be one of the largest mines in the province licenses for beetle-killed timber in the Williams Lake Timber Supply Area have led will likely be temporary.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

Cariboo
Regional District

13 Demographics

Net migration has fluctuated drastically over the last two decades. Out-migration has continued from the region since the mid-nineties. The dependence on male-dominated resource sector industries is the reason for a gender ratio that is weighted in favour of males, in contrast to the province as a whole, where there are more females than males. The elderly dependency ratio is lower than the provincial average while the child dependency ratio is slightly higher, therefore, the median age of the population of this area is slightly younger than the provincial median.

14 Projection

This area could experience rapid growth if the new mines come on line, although there will likely be outflows due to the recent closures. The cancellation of the temporary licenses for beetle-killed timber, when it occurs, could result in net outflows for a few years.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds (,000)	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages		Child	Elderly	Total

Central Coast
Regional District

1 General Economy

Forestry, tourism and fishing dominate the economy of this sparsely populated region. Harvesting is the main activity in the forest sector as there are no large processing facilities in the area. The dependence on harvesting makes this region particularly prone to reductions in Allowable Annual Cuts. The AAC for the Mid Coast Timber Supply Area was reduced again recently. Reduction in the AACs from the creation of the Great Bear Rainforest could result in some migration away from communities whose residents are involved in the harvesting and transportation of Central Coast timber.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

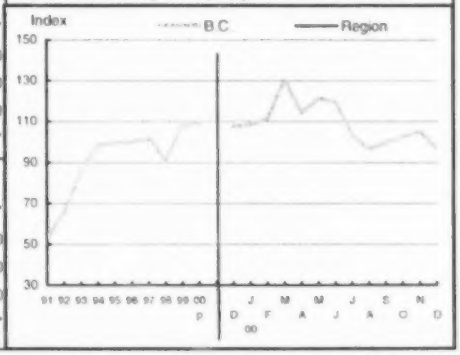
Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Central Coast
Regional District

13 Demographics

The population in this area is largely Native. The Native population tends to be younger, on average, than non-Natives, and as a result, the median age of the population in this area is substantially younger than the provincial median. There are proportionately far more children in the population, with the ratio of children (aged 17 and under) to working age population (aged 18 to 64) higher than the provincial ratio. Also, the ratio of elderly (aged 65 and over) to working age population is substantially lower than the provincial ratio.

There are more men than women in this area, in contrast to the province as a whole, where the reverse is the case. The median age of death is substantially younger than for the province as a whole, and this is partly due to this gender bias in favour of men, who tend to have lower life expectancies than women, and partly due to the concentration of Natives, who tend to have lower life expectancies than non-Natives.

14 Projection

This area has had small population growth with net migration oscillating above and below zero but remaining positive overall. Impacts on the forestry and fishing industries will likely result in an overall trend of mild out-migration. Natural increase should remain positive for most of the projection period but will likely not increase the population due to out-migration.

15 Selected Demographic Characteristics

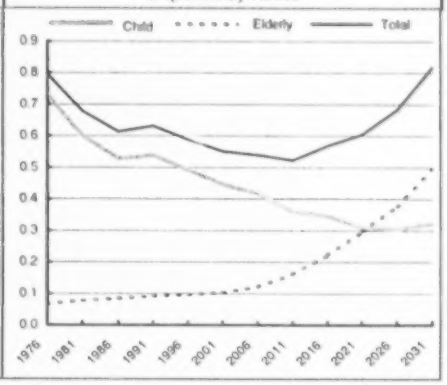
Dependency Ratios



Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Castlegar, Creston, Kaslo, Nakusp, Nelson, New Denver, Salmo, Silverton, Slocan

Forestry is one of the main economic drivers for this region, particularly in the Castlegar and Arrow Lakes areas. Construction activity associated with the major dams in the area also provide some employment.

There are major hydroelectric construction projects either underway, or planned for the near future, which should boost the employment base for this region, at least for the short term. The upgrading of the Waneta dam is already underway with the first unit completed and construction on the second unit to begin in 2002. The Keenleyside dam construction is also underway and the Brilliant dam is being updated and expanded, with completion expected in 2002.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca

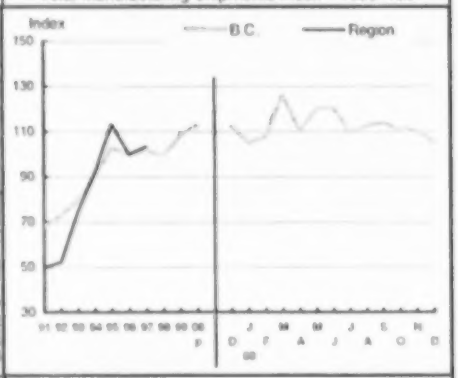
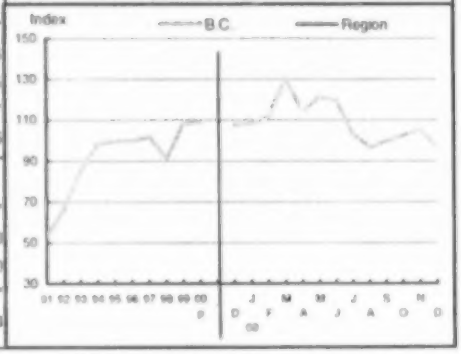
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Central Kootenay
Regional District

13 Demographics

Like many resource dependent regions in the province, this area experienced net migration outflows in the mid-eighties due to the downturn in the resource sectors. However, net migration to this region through the mid-nineties was fairly high, becoming negative in the last few years.

The median age of the population in this region is higher than the provincial median age. This is reflected in the proportion of elderly in the population, which is higher than the corresponding provincial figure.

14 Projection

Job losses in the forestry sector combined with those resulting from the completion of dams will likely lead to some out-migration in the short-term. Construction activity associated with further dam upgrading and expansion will provide some employment. Over the long-term, net migration should become positive as the resource sector recuperates and the economy diversifies, more than offsetting losses due to more deaths than births. This will result in a trend towards population growth for this region.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

1 General Economy

Municipalities in Regional District: Kelowna, Lake Country, Peachland

The economy of this region is well diversified. Tourism, forestry, and agriculture all are important industries in the region. The warm climate makes this area one of the more important agricultural centres (for tree fruits and wine grapes) in the province and is one of the attractions for tourists. It also makes the region a popular retirement centre.

The stability of the agricultural and tourism sectors and the popularity of the region as a retirement centre should ensure continued growth for this region. The Coquihalla highway has made this area even more popular as a tourist destination, and the improved transportation links to the Lower Mainland have enhanced the Central Okanagan as a place to locate secondary industry.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

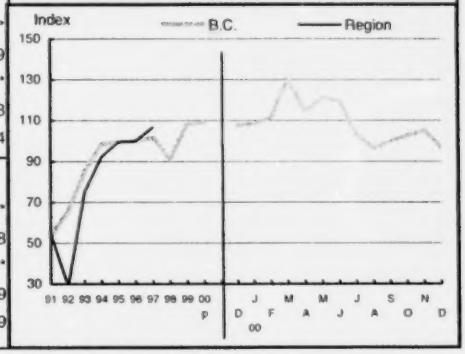
Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Central Okanagan
Regional District

13 Demographics

High inflows of interprovincial migrants have resulted in the population of this area more than doubling in the last 25 years. This region was one of the highest growth areas in the province through the nineties.

Due to the presence of a large retirement base, the median age of the population is higher than the provincial median. Since women tend to live longer than men, this also helps explain the bias towards females in the gender ratio. The ratio of females to males is higher than the provincial ratio. The elderly dependency ratio (i.e., the ratio of those aged 65 and over to those aged 18 to 64) is higher than the ratio for the province as a whole.

14 Projection

The diversity of the economy and the pleasant climate make this area one of the more popular locations to move to in the province. This will likely continue to be the case for some time and this region can expect to continue to receive large net inflows of migrants throughout the projection period. As the population ages and fertility rates drop, deaths will exceed births. Despite the reduction in natural increase, population growth in this area will remain strong due to the net inflows of migrants.

15 Selected Demographic Characteristics

1 General Economy

Municipalities in Regional District: Golden, Revelstoke, Salmon Arm, Sicamous

The economy of this region is based on forestry, tourism and services and construction related to rail transportation and hydro facilities. In the past, the Revelstoke area was the beneficiary of several mega-projects, and as a result, received large inflows of migrants. However, once the projects were completed, many of these people moved on, suggesting the construction activity was artificially propping up the population. The Golden area has experienced a surge in population related to the construction and operation of Kicking Horse Mountain Resort, which opened during 2000.

The resource sectors in this region have been struggling over the last few years with mill and mine closures occurring. The Evans Forest Products' mill has managed to stay operating. However, if the Evans mill ever does shut down permanently, there will likely be significant population effects for this area. There are some promising mineral deposits in the region that could lead to future mine development.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

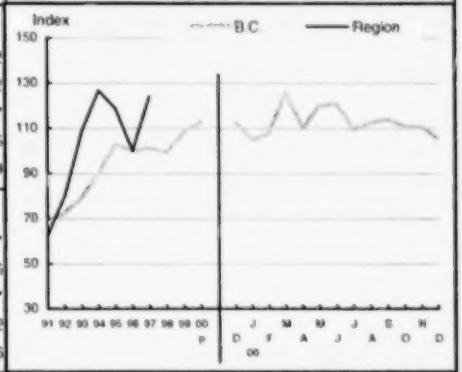
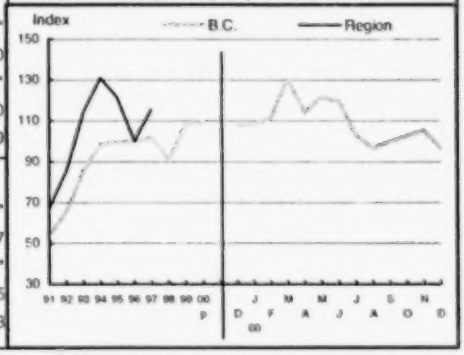
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

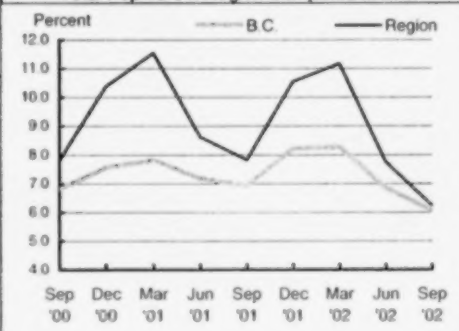
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Columbia-Shuswap
Regional District

13 Demographics

Net migration has fluctuated between negative and positive figures over the last two decades with some out-migration again in recent years; however, over all it has contributed to population growth. The climate of the region has drawn a large number of retirees, particularly to the Salmon Arm area, and as a result, the median age of the region's population is higher than the provincial median. The total fertility rate is only slightly higher than the provincial figure.

14 Projection

Losses in the forest and mining sectors will dampen migration to this area somewhat, but the proximity of Salmon Arm to the Northern Okanagan, should result in spin-off growth from those areas. As a result, migration to the region as a whole will likely be positive, although at lower levels than those experienced in the mid-nineties. The end result will be reasonably strong population growth for this region over the projection period.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

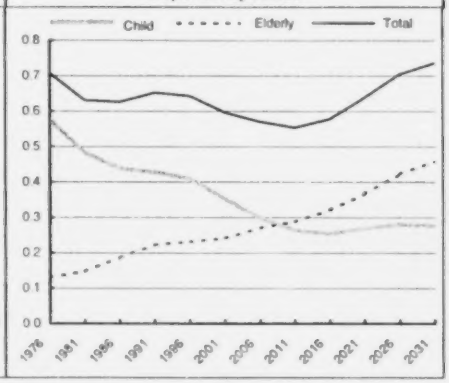
Dependency Ratios



Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Campbell River, Comox, Courtenay, Cumberland, Gold River, Sayward, Tahsis, Zeballos

Forestry is the most important economic activity in this region. Some of the smaller municipalities, in particular, are highly dependent on the forest sector. Other important resource sectors in this region are mining and fishing. There are currently two major mines in the region: the Quinsam Coal Mine and the Myra Falls Mine, both near Campbell River.

Developments that will affect the population of this region include the closure of the pulp mill at Gold River, the closure of the Tahsis lumber mill, and the closures of the coal and metal mines some time during the projection. The pulp mill closure has had an impact on the town of Gold River and has already resulted in some population movement from the area. The Tahsis mill closure will likely result in substantial net migration outflows beginning in 2001. The mines are not scheduled to close for some time, but when they do, there will likely be a significant population impact. The Quinsam mine has experienced some major layoffs in the last few years and there may be population impacts as a result.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

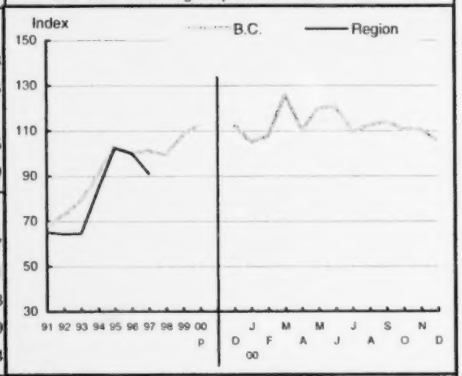
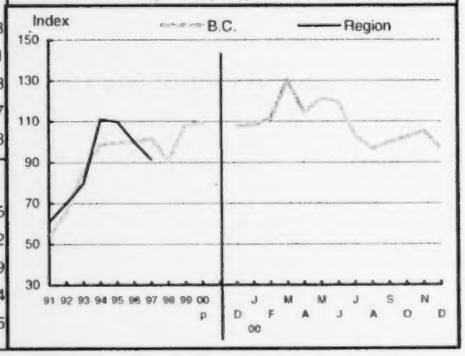
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Regional District

13 Demographics

The dependence on resource industries is likely the reason for the gender bias in favour of males in this region, since most of these industries tend to have male-dominated employment. The male gender bias is in contrast to the province as a whole, which has more females than males. Since men tend to have a shorter life expectancy than females, it is not surprising that the median age of death is lower in this area compared to the province as a whole.

14 Projection

The diversity of the Courtenay and Campbell River areas should draw migrants to this region for most years. Downturns in the forest sector will likely continue to fuel out-migration for at least the short term. It is expected that the high pace of growth in the early to mid nineties cannot be sustained. Population growth rates will likely rise slowly for the first few years of the projection becoming moderately strong to the end of the forecast. Natural increase will likely decrease, gradually reducing the population growth rate.

1 General Economy

Municipalities in Regional District: Duncan, Ladysmith, Lake Cowichan, North Cowichan

Forestry is the main economic driver for this region, but tourism and services related to the retirement community are also important. Many economic spin-offs arise from the region's location between the Capital Regional District and the Nanaimo Regional District. Several communities within the region serve as bedroom communities to either Victoria or Nanaimo. Nonetheless, the economic dependence on forestry makes the area vulnerable to downturns in the forest sector.

The Allowable Annual Cut (AAC) will be reduced by 7% to 373,000 cm in the fall of 2002. Cuts to the AAC could have repercussions for individual communities within the region, particularly those with mills dependent on wood from the affected areas.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

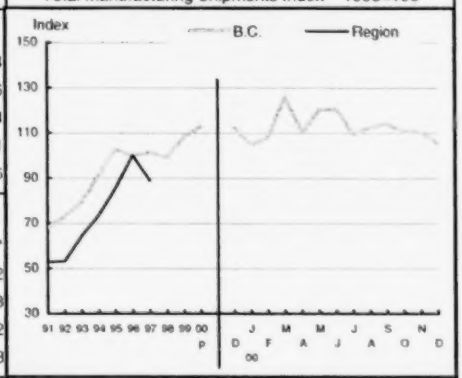
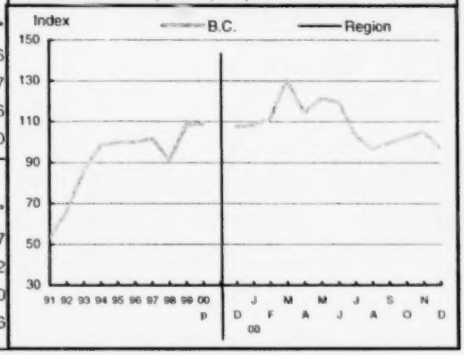
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

Cowichan Valley
Regional District

13 Demographics

This region suffered substantial decreases in migration in the mid-eighties and again recently because of the downturn in the forest sector. Due to a growing retirement community, the median age of the population has been getting older and is slightly higher than the British Columbia median age. The elderly dependency ratio (i.e., the ratio of those aged 65 and over to those aged 18 to 64) is higher in this region than for the province as a whole, but the child dependency ratio (i.e., the ratio of those aged 17 and under to those aged 18 to 64) is also higher than the provincial ratio. This is partly the result of a substantially higher fertility rate for this area compared to the province as a whole.

14 Projection

This area has benefited from spin-off growth from both Victoria and Nanaimo and will likely continue to do so. Deaths will likely begin to exceed births in the next few years. In the short-term, forestry job losses will likely result in out-migration. In the long-term, net migration is expected to become positive, contributing substantially to population growth.

1 General Economy

Municipalities in Regional District: Cranbrook, Elkford, Fernie, Invermere, Kimberley, Radium Hot Springs, Sparwood

The East Kootenay region is one of the main centres of British Columbia's coal industry. The economy of the Fernie area, in particular, is driven by the coal industry with five major coal mines located there. As a result, the region is vulnerable to fluctuations in price and demand in the coal market, which are largely determined internationally. The Sullivan lead-zinc mine in Kimberley was, until recently, the main economic driver for that area, and forestry is the main driver in the Cranbrook and Windermere areas.

A major development that will affect this area was the closure of the Sullivan Mine in Kimberley. Depletion of coal reserves could also have a negative effect on the region over the long-term, although the area has good potential for new discoveries. Development of new mines will depend on the direction of coal prices.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

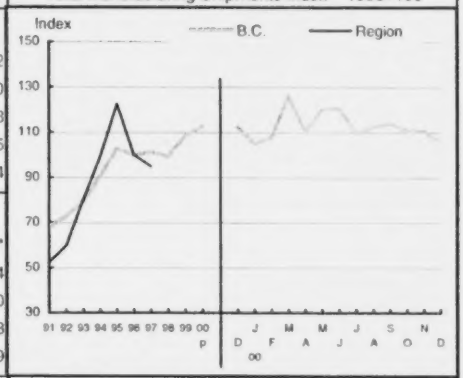
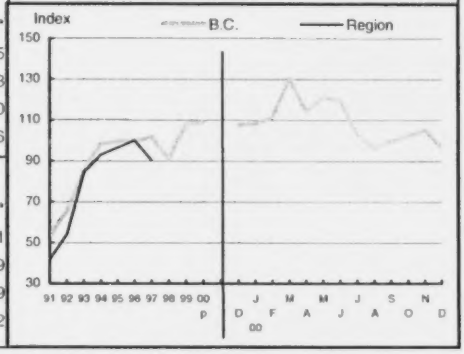
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

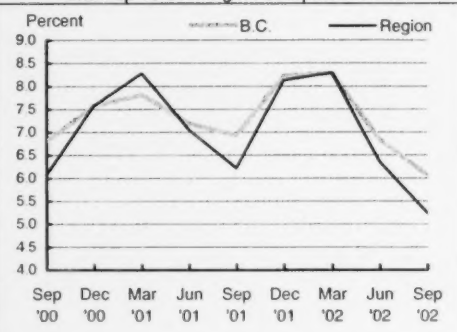
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

East Kootenay
Regional District

13 Demographics

The median age of the region's population is slightly higher than the provincial median, and the proportion of children in the regional population is similar to the province as a whole. The gender ratio is weighted in favour of males, likely due to the predominance of male-dominated professions in the area. Since men tend to have a shorter life expectancy than women do, it is not surprising that the median age of death in this region is lower than the provincial median.

14 Projection

The Sullivan Mine closed in 2001. This will have a significant impact on the employment base of the area during for the next several years. In addition, depletion of coal reserves could cause the shutdown of several of the coal mines in the region. Increased productivity and low prices could erode the employment base resulting in an over all trend of out-migration from the area.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Mackenzie, McBride, Prince George, Valemount

Forestry is by far the main economic driver for this region, with tourism playing a lesser, though still important, role. Prince George is the main service centre of the northern interior of the province and the service sector is particularly important to the city's economy. Positioned as it is at the junction to the North to Alaska, the South to Vancouver, the East to Alberta and the West to Prince Rupert, Prince George experiences a great deal of tourist activity.

Developments in the forest sector will likely drive growth in this region in the future. This area is home to many pulp mills and sawmills and it is crucial that the timber supply to this area is sustained if it is to maintain its job base. There have been a couple of mill closures in the last couple of years in this area and there will likely be some population impacts as a result.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

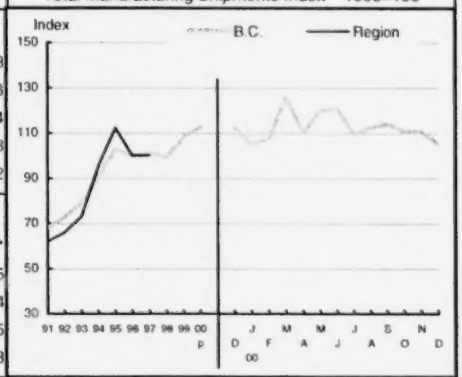
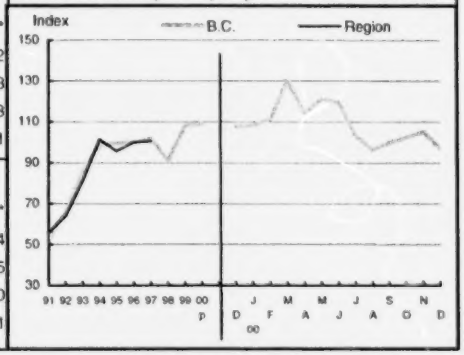
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

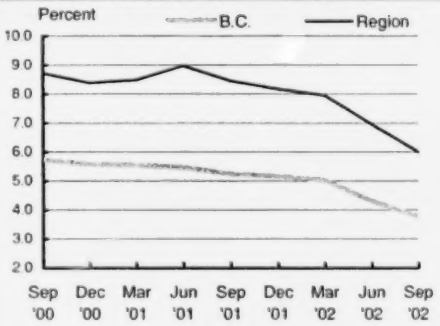
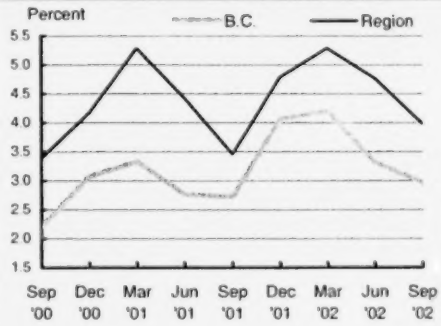
Duration of Dependence on Basic BC Benefits (As of Sep '02)

	Region	B.C.
Total Number of Recipients	5,524	134,102
Percent Distribution by Duration		
<1 Year	38.3	33.3
1-2 Years	18.3	18.9
>2 Years	43.5	47.8

All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996.

Source: Human Resources Development Canada and BC STATS population estimates.

?rior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

Fraser-Fort George
Regional District

13 Demographics

The downturn in the forest sector in the mid-eighties and early nineties was responsible for much of the net out-migration from the area at that time. In the mid-nineties the area received large net inflows of migrants. Some of this may be due to the construction of the University of Northern British Columbia in Prince George although most areas experienced growth during this time period.

The median age of the population in this area is lower than the provincial median, and this is reflected in the ratio of children (aged 17 and under) to working age population (aged 18 to 64), which is higher than the provincial ratio. Conversely the ratio of elderly (aged 65 and over) to working age population is lower than the provincial ratio. The dependence on the forest sector and the male-dominated employment in the industry is likely the reason for the gender ratio that is weighted in favour of males.

14 Projection

Although forestry is the main economic driver, the economy of this area is sufficiently diversified such that it can expect to continue to receive net migration inflows over most of the projection period with the exception of the next few years. The natural increase (excess of births over deaths) is expected to be positive as well, which means the area will continue to experience overall positive growth.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

1 General Economy

Municipalities in Regional District: Chilliwack, Abbotsford, Harrison Hot Springs, Hope, Kent, Mission

In the areas of the Fraser Valley furthest from Vancouver, agriculture and forestry are the main economic drivers. For the areas closer to Vancouver, the industrial base of Greater Vancouver is the main stimulus for the economy.

The agreement by the municipalities in the Greater Vancouver Regional District (GVRD) on a Livable Region Strategic Plan will have consequences for this region. As the GVRD begins to put the infrastructure in place to promote its Growth Concentration Area, the recent trend of growth moving out into the Valley will likely slow considerably. Growth rates experienced in the last decade will be substantially higher than those experienced in the next.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

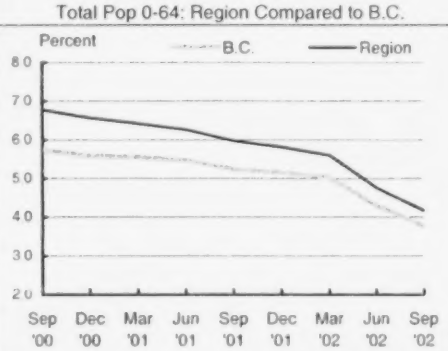
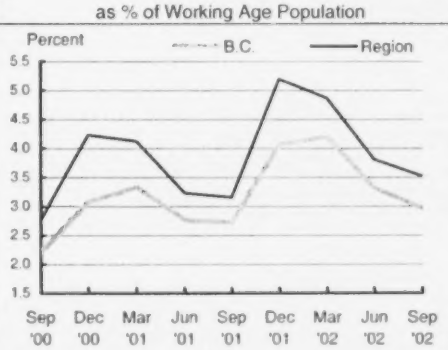
All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996.

Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

Fraser Valley
Regional District

13 Demographics

Although this region is still far more rural than the neighbouring GVRD, the population density is four times that of the province as a whole. The more rural nature of the region is one of the reasons for the substantially higher total fertility rate compared to the provincial rate. As a result, the ratio of children (aged 17 and under) to working age population (aged 18 to 64) is higher than the corresponding provincial ratio. The natural increase (i.e., the excess of births over deaths) is quite high for this region, with almost one and a half times the amount of births compared to deaths.

14 Projection

Net migration to this region has been high in the last couple of decades, and this will likely continue to be the case in the future, due to the large availability of land. However, growth should be tempered as a result of the GVRD's Livable Region Strategic Plan, which attempts to make more efficient use of land in the Growth Concentration Area and draw more people into urban Vancouver. Despite this, the combination of continued high natural increase and substantial inflows of migrants will result in strong population growth for this region.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

Greater Vancouver
Regional District

1 General Economy

Municipalities in Regional District: Anmore, Belcarra, Bowen Island, Burnaby, City of Langley, Coquitlam, Delta, Langley DM, Lions Bay, Maple Ridge, New Westminster, North Vancouver City, North Vancouver DM, Pitt Meadows, Port Coquitlam, Port Moody, Richmond, Surrey, Vancouver, West Vancouver, White Rock

This region constitutes the economic heart of the province. Manufacturing, trade, and service activity in the Vancouver area are the main economic drivers for the region as a whole. Areas in the region outside of metro Vancouver are mainly residential and industrial suburbs.

The municipalities of the Greater Vancouver Regional District (GVRD) have come to an agreement on a Livable Region Strategic Plan. This plan designates a "Growth Concentration Area" where infrastructure such as rapid transit will be put into place to accommodate increased growth. This plan is certain to affect the growth patterns of this and neighbouring regions.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

Greater Vancouver
Regional District

13 Demographics

This is the most densely populated region in the province, over 100 times more so than the province as a whole. Although the region comprises only a small portion of the land base of the province, it contains approximately half the population. For this reason, many of the demographic characteristics of the area are similar to those of the province as a whole, although due to the more urban nature of the area, the total fertility rate is lower than the provincial rate.

Net migration to this area has been quite strong over the last twenty years, and it is projected that this will continue to be the case over the next two decades as well. The region can expect the addition of almost one million people in the next 30 years.

14 Projection

The Livable Region Strategic Plan will likely slow the current trend of growth outward toward the Valley and shift growth back into the urban core. As a result, this region will continue to experience strong growth and will remain the main population centre in the province.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							Households (,000)	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages		Child	Elderly	Total

1 General Economy

Municipalities in Regional District: Hazelton, Kitimat, New Hazelton, Stewart, Terrace

Forestry and mining are important economic drivers for this region. The Eskay Creek Mine near Stewart is one of the largest silver producers in the world. The Snip mine closed in the spring of 1999 due to ore depletion. The Alcan aluminum smelter at Kitimat is the main employer in that area and is the largest aluminum smelter in Canada outside Quebec.

There have been several developments affecting this region recently. The recent Nisga'a land claims settlement could have significant effects for the entire region, and the Nisga'a area in particular. However, the effects of the Nisga'a settlement are still largely unknown. This area is high in mineral potential and several new mines are being considered, which could have significant employment impacts for the region. In addition, Alcan has reached an agreement with the government over compensation for the Kemano Completion Project, which could lead to another smelter or smelter expansion in Kitimat.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

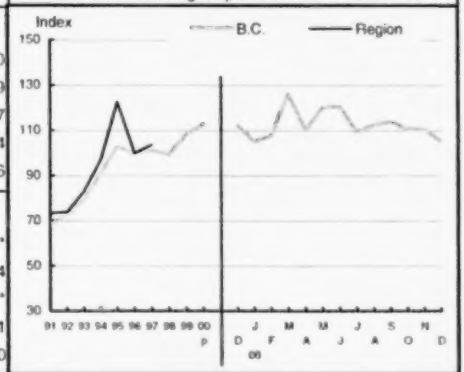
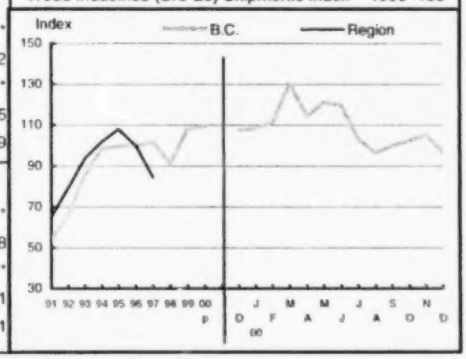
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

*Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details.

Kitimat-Stikine
Regional District

13 Demographics

The gender ratio for this region is heavily weighted in favour of males, in contrast to the province as a whole, which has more women than men. This is likely due to the predominance of male-dominated professions in the area. The median age of the population is substantially younger than the provincial median. There are proportionately far more children and far fewer elderly in the population compared to the province as a whole.

14 Projection

This region is expected to experience moderate growth throughout the projection period from a combination of positive natural increase (excess of births over deaths) and positive net migration and there may be rapid growth if proposed projects such as smelter expansion or new mines become reality.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

1 General Economy

Municipalities in Regional District: Fruitvale, Grand Forks, Greenwood, Midway, Montrose, Rossland, Trail, Warfield

The Cominco Smelter at Trail is the main economic driver for this region. Most of the people working in the Trail area are either directly employed by Cominco, or work in a job providing goods and services that is directly or indirectly dependent on Cominco. In the Grand Forks and Kettle Valley areas, forestry is the main economic driver.

There are major hydroelectric construction projects either underway, or planned for the near future, which should boost employment for this region, at least for the short term. The upgrading of the Waneta dam is already underway with the first unit completed and construction on the second unit to begin in 2002. The Keenleyside dam construction is also underway and the Brilliant dam is being updated and expanded, with completion expected in 2002.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

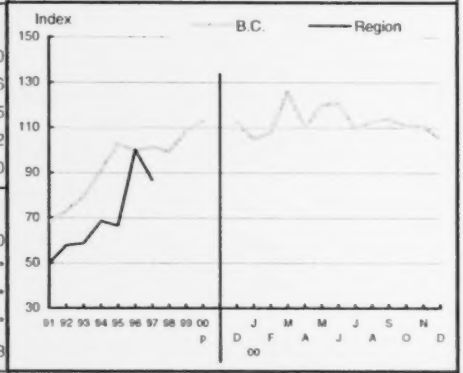
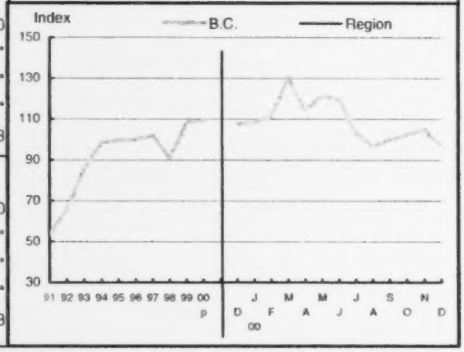
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Kootenay-Boundary
Regional District

13 Demographics

The median age of the population of this region is older than the provincial median. As a result, the ratio of elderly (aged 65 and over) to working age population (aged 18 to 64) is also higher than the corresponding provincial ratio. However, the ratio of children (aged 17 and under) to working age population is also higher than the provincial ratio. This age structure is likely the result of layoffs in the resource sectors and at Cominco, that have forced those young workers with less seniority to move elsewhere to find jobs. Those left behind are generally older and more likely to have families.

14 Projection

Job losses in the forestry sector will likely continue resulting in out-migration for the short-term. This region is expected to receive small net inflows of migrants over in the long-term and this will lead to slow, steady population growth. However, towards the end of the projection the losses due to a negative natural increase (i.e., deaths outnumbering births) may outweigh inflows of migrants and there could be a slight population decline.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

Mount Waddington
Regional District

1 General Economy

Municipalities in Regional District: Alert Bay, Port Alice, Port Hardy, Port McNeill

Forestry is by far the most important economic activity in this region, although fishing and tourism also play important roles. The forest sector is dominated by logging activity and the pulp mill at Port Alice.

Developments in the resource sectors will likely determine the amount and direction of population growth in this area. The downturn in the forest sector, reductions to the commercial fishing fleet and downsizing by the Federal government have hurt this region and out-migration has resulted.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

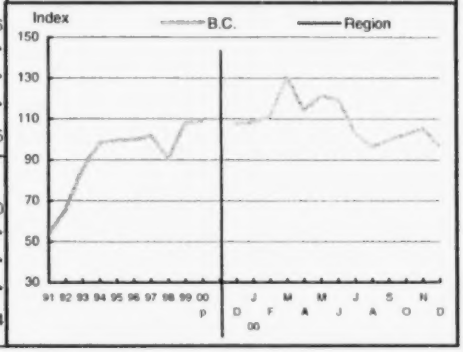
Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

?rior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details.

Mount Waddington
Regional District

13 Demographics

The dependence on the male-dominated professions in the resource sectors is the reason for the heavy weighting of the gender ratio in favour of males in this area. Nonetheless the total fertility rate is higher than the provincial average.

The median age of the population is also substantially younger than the provincial median and this is reflected in the child and elderly dependency ratios. The child dependency ratio (i.e., the ratio of those aged 17 and under to those aged 18 to 64) is higher than the provincial ratio, while the elderly dependency ratio (i.e., the ratio of those aged 65 and over to those aged 18 to 64) is substantially lower than the provincial ratio.

14 Projection

The long-term outlook for this region is for consistent net migration outflows. The natural increase (the excess of births over deaths) will likely continue to drop, lowering the population growth rate even further over the duration of the projection.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

1 General Economy

Municipalities in Regional District: Nanaimo, Parksville, Qualicum Beach

Forestry is the primary economic driver in this region. The forest sector includes logging, lumber milling, veneer production, and pulp manufacturing. In addition, the service sector is an important segment of the economy. The City of Nanaimo is the main service and distribution centre for central Vancouver Island. The Qualicum area is a growing retirement centre, which also drives the service sector.

This region has experienced a great deal of residential construction in past years, with a few developments still underway in Parksville. This is a reflection of the strong population growth experienced recently in this region.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

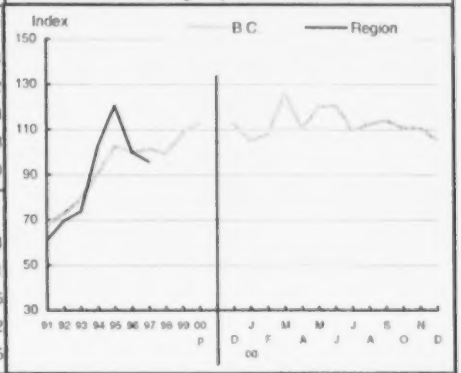
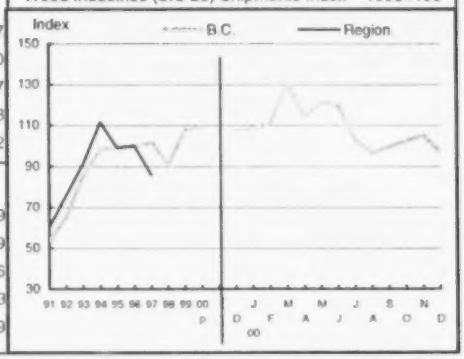
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points, on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Nanaimo
Regional District

13 Demographics

Although net migration to this region declined in the mid-eighties and late-nineties during the downturns in the forest sector, it remained positive. This is likely due to the strong service sector in Nanaimo. The large amount of service sector jobs combined with the substantial amount of retirees in the Qualicum area are likely the reasons why there is a gender bias in favour of females. With more females than males, Nanaimo is unlike neighbouring regions that are more dependent on the forest sector where jobs are more male-dominated. The retirement base is the reason why the median age of the region's population is higher than the provincial median.

14 Projection

Nanaimo's role as service centre for the central Island and the growing retirement base in the region should ensure that it continues to experience strong growth. It is projected that recent strong, positive net migration will persist in this area and it will continue to expand rapidly, growing in population by approximately 60 per cent over the next 30 years.

1 General Economy

Municipalities in Regional District: Armstrong, Coldstream, Enderby, Lumby, Spallumcheen, Vernon

The economy of this region is fairly diversified. Forestry, agriculture and tourism all play important roles. The climate in this area is an attraction for tourists, as well as providing a suitable environment for agriculture. The stability of the agricultural sector has likely helped to dampen the fluctuations in migration and raise total fertility rates. An increasingly diversified economy should also help promote stability.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

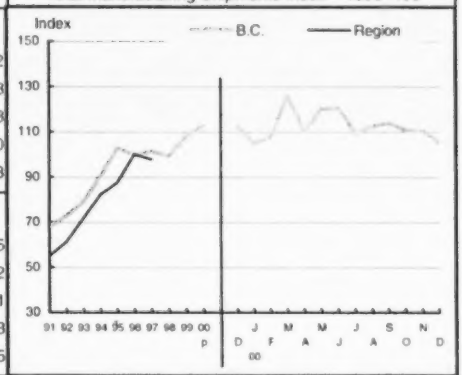
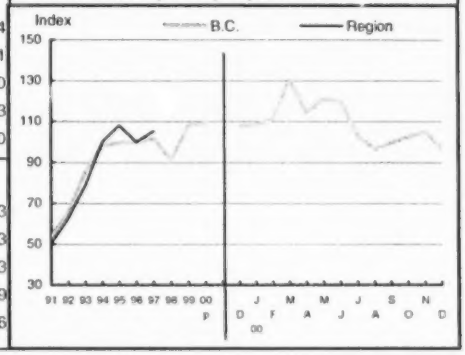
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points, on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

North Okanagan
Regional District

13 Demographics

Net migration appears to be recovering from the negative values from the late nineties. The stability of the agricultural sector and the pleasant climate are contributory factors to population stability in this region.

The median age of the area's population is higher than the provincial median, as is the elderly dependency ratio (i.e., the ratio of those aged 65 and over to those aged 18 to 64). As well, the child dependency ratio (i.e., the ratio of those aged 17 and under to those aged 18 to 64) is also higher than the provincial ratio making the overall dependency ratio approximately ten percentage points higher than it is for British Columbia as a whole.

14 Projection

As with most of the Okanagan, net migration should tend to be positive over the duration of the projection. The rates of in-migration may not reach those of the early nineties but should be high overall and despite the negative natural increase this area should have a high population growth rate.

15 Selected Demographic Characteristics

Northern Rockies
Regional District

1 General Economy

Municipalities in Regional District: Fort Nelson

Forestry, tourism and oil and gas exploration are the major economic drivers for this region. There are two large processing facilities located in Fort Nelson that employ close to 600 people between them. The north-eastern region of the province is a producer of oil and gas and exploration in this sector has and will continue to employ a large number of people.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

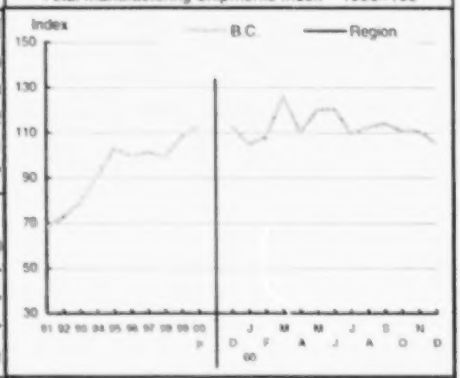
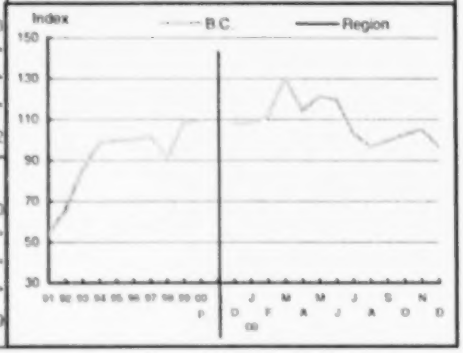
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points, on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Northern Rockies
Regional District

13 Demographics

The economic dependence on the resource sectors and the male-dominant employment in these sectors is the main reason for the heavy weighting of males in the population in this area, in contrast to the province as a whole, which has more women than men. The remoteness of the area is likely the reason why the median age of the population is far lower than the provincial median. The total fertility rate is higher than the provincial rate, and is likely partially the reason for a higher ratio of children (aged 17 and under) to working age population (aged 18 to 64) compared to the province as a whole. There is a very small proportion of elderly in the population compared to British Columbia as a whole.

14 Projection

Net migration will likely remain negative for the next couple of years, but should become positive as the resource sector is expected to recuperate. Natural increase (i.e., the excess of births over deaths) will gradually drop over the projection period, being positive for the most part; therefore there should be an overall tendency towards population increase for the area.

15 Selected Demographic Characteristics

1 General Economy

Municipalities in Regional District: Keremeos, Oliver, Osoyoos, Penticton, Princeton, Summerland

Agriculture has traditionally been the main economic driver for this region. Although this sector has diminished somewhat in importance, it is still an important factor of the economy, and this area remains one of the more important centres of agriculture in the province. Other economic drivers include tourism and forestry.

The two major mines in the area—the Similco Mine at Princeton, and the Nickel Plate Mine at Hedley—have shut down in the last few years. The mine at Hedley closed due to ore depletion, but the Similco mine still has reserves remaining and could reopen once copper prices improve.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca

Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Okanagan-Similkameen
Regional District

13 Demographics

Like the rest of the Okanagan, this region experienced tremendous growth in the last decade due to very high net migration inflows.

The pleasant climate of this area makes it a popular place to retire, and as a result, the median age of the population of this region is substantially higher than the provincial median age. The elderly dependency ratio (i.e., the ratio of those aged 65 and over to those aged 18 to 64) is over twice that of the province as a whole. The older age structure is responsible for the gender bias in favour of females, since women tend to live longer than men do.

14 Projection

The natural increase (i.e., the excess of births over deaths) is negative in this region, and will likely become even more negative over the projection period. However, it is expected that net migration to this area will continue to be high, which will compensate for deaths. The shutdowns in the mining sector will likely have only a small impact on the region as a whole. This area is high in mineral potential and there is a possibility of new mines opening once metal prices improve.

1 General Economy

Municipalities in Regional District: Chetwynd, Dawson Creek, Fort St. John, Hudson's Hope, Pouce Coupe, Taylor, Tumbler Ridge

The economy of this region is fairly diversified, with coal mining, oil and gas exploration, forestry and agriculture all being important economic activities. The north-eastern region of the province is a producer of oil and gas, and exploration in this sector has and will continue to employ a large number of people. The Ladyfern gas field, just north of Ft. St. John, is among the largest in the world. Rising energy prices coupled with new gas discoveries created a lot of activity in the Fort St. John area recently. One of the two major coal mines in the area, Quintette, was shut down in August, 2000. The Bullmoose mine will continue to supply coal to Japanese markets until 2003, but should be replaced by two new coal mines starting in the Chetwynd area. The building of an OSB mill has been put on hold.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

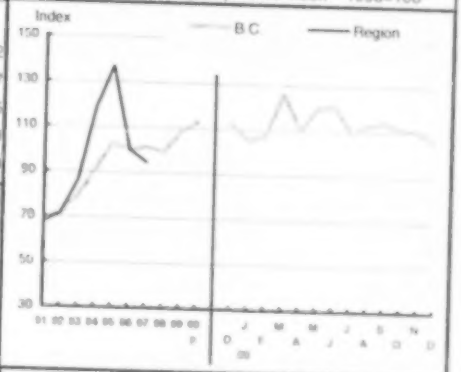
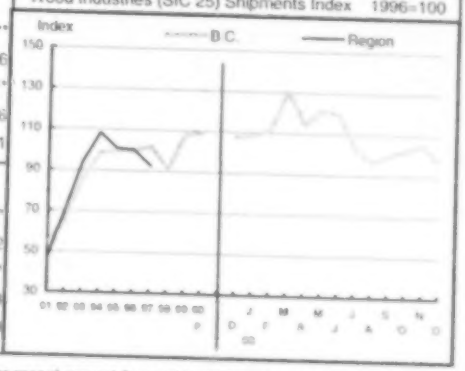
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

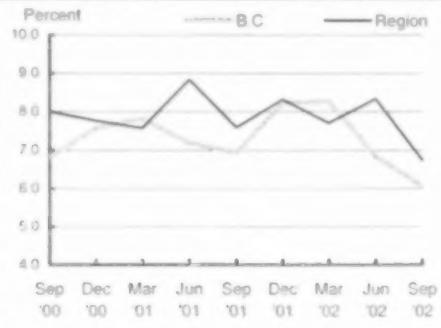
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Peace River
Regional District

13 Demographics

Due to the dependence on the mining and forestry sectors, which tend to have male-dominated employment, the gender ratio for this region is weighted in favour of males. The total fertility rate is higher in this area, and could partially explain the higher ratio of children (aged 17 and under) to working age population (aged 18 to 64) compared to the province as a whole. As a result, the median age of the population is lower than the provincial median.

14 Projection

The increased activity in the oil and gas industry should result in modest growth for this region, although it will be overshadowed in the short-term by the layoffs in the forests and mines, which could result in out-migration for the next couple of years. The long-term growth combined with a positive natural increase (the excess of births over deaths) will result in trend of positive population growth for the area until the end of the projection period.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Powell River

Forestry-related manufacturing is the main economic driver for this area. Pacifica Paper is the primary employer in Powell River, and this area is highly dependent on the fortunes of the mill. The area is trying to diversify its economic base by developing a retirement community at Powell River. The dependence on a single major employer has resulted in outflows in the past when the mill underwent downsizing, and anything that would help diversify the economy would certainly be beneficial in terms of population stability.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

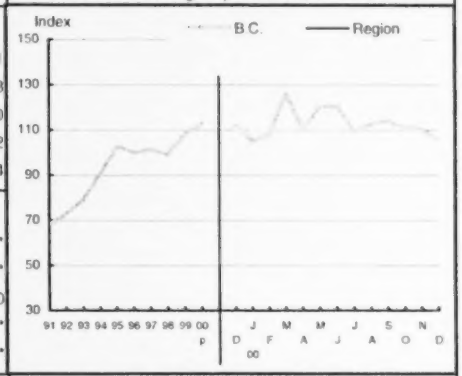
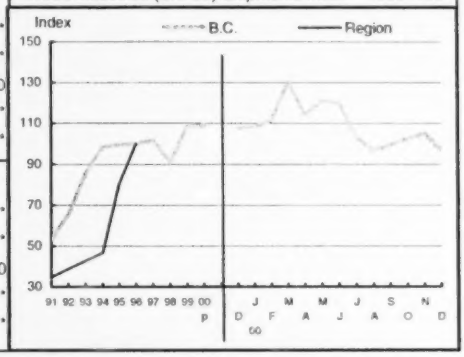
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

Powell River
Regional District

13 Demographics

The gender ratio of this area is weighted in favour of males, in contrast to the province as a whole, which has more females than males. This is likely due to the dependence on the forest sector, which tends to be male-dominated. The median age of the population is higher than the provincial median, probably due the number of retirees attracted to the area.

14 Projection

Although this area is attempting to diversify its economy, developments in the forest sector will continue to have important impacts. It is likely that economic cycles in the forest sector will continue to affect the employment base of the area. In the short-term, developments at the mill will likely result in population declines as layoffs occur. As well, the number of deaths will grow, while births will likely decline. Despite fluctuations, the overall average population for this area should decline steadily over time.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

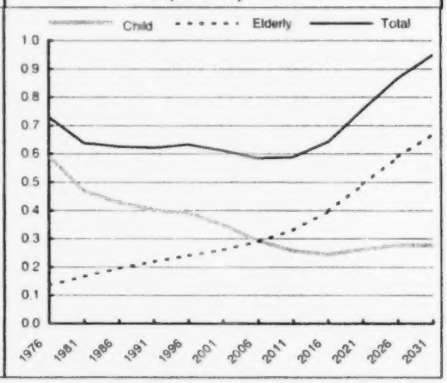
Dependency Ratios



Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Masset, Port Clements, Port Edward, Prince Rupert

Fishing and forestry are the primary economic activities in this region. The Prince Rupert area has the largest concentration of fish processing facilities in the province outside the Vancouver region.

Developments affecting this region include cutbacks in the forest sector and possible further restrictions imposed on the fishing industry to avoid depletion of salmon stocks. The Prince Rupert area has seen some movement from the area in recent years and this out-migration is likely to continue if there is no improvement in the resource sectors. Skeena Cellulose has been sold but the new owners are still in negotiations with the workers. Off-shore oil drilling may start in several years and would have a significant impact on population.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

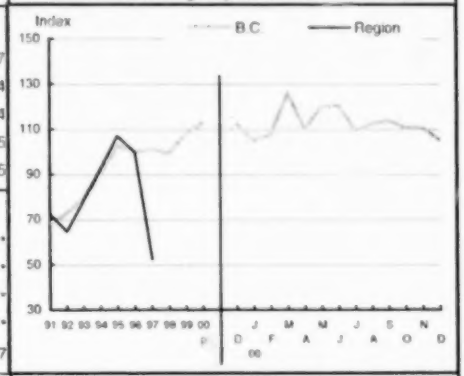
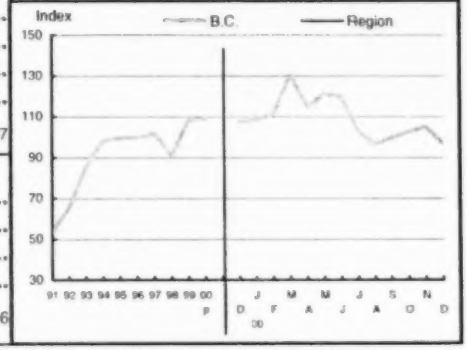
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

Skeena-Queen Charlotte
Regional District

13 Demographics

This region has generally experienced net migration outflows over the last 25 years. The natural increase (i.e., the excess of births over deaths) has offset migration outflows, but in some years there has been a population decline.

The gender ratio for this area is substantially weighted in favour of males, in contrast to the province as a whole, which has more females than males. This is likely due to the dependence on male-dominated resource industries. Since men tend to have lower life expectancies than women, the median age at death is lower than the provincial median. The overall median age is also lower than for the province as a whole and this is reflected in the ratio of children (aged 17 and under) to working age population (aged 18 to 64), which is much higher than the provincial ratio, and the ratio of elderly (aged 65 and over) to working age population, which is much lower than the provincial ratio. Also, the total fertility rate in this region is substantially higher than the provincial rate.

14 Projection

This region has generally experienced net outflows of migrants and it is expected that this trend will continue although not to the same extent. Deaths will likely begin to exceed births towards the end of the projection period, and in combination with the out-migration, should result in a negative population growth rate.

Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Lillooet, Pemberton, Squamish, Whistler

Tourism has overtaken forestry as the main economic driver for this region, mostly on the strength of the ski resort at Whistler. As the Whistler resort becomes more all-season, there should be reduced seasonal variation in the resident population. The forest sector is still the dominant activity in the Lillooet area.

Developments that will affect the population in this region include several tourism-related projects such as a couple of new resorts being planned that could take some of the growth pressure off Whistler. As well, a new university may start in Squamish.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

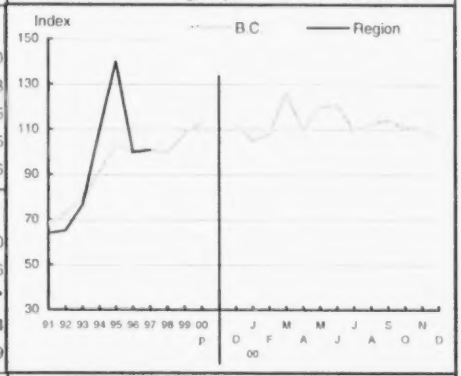
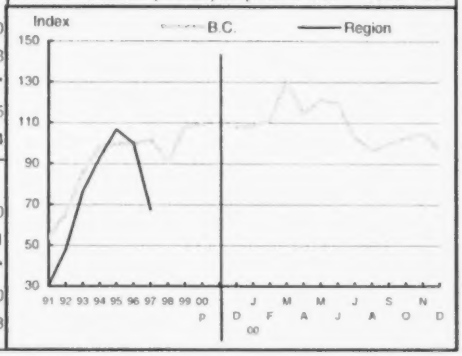
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specific input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

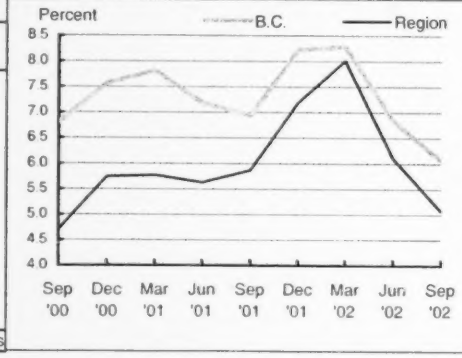
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Squamish-Lillooet
Regional District

13 Demographics

The forest sector and construction activity are important components of the economy and this is evident in the gender ratio, which is biased in favour of males, since forest employment tends to be male-dominated. This is in contrast to the province as a whole, which has more females than males.

The median age of the population of this region is substantially younger than the provincial median, and this is due to a small proportion of elderly (aged 65 and over) compared to the province as a whole. The ratio of elderly to working age population (aged 18 to 64) is less than half the provincial ratio.

14 Projection

This area had one of the fastest growing populations in British Columbia in the early nineties. As the burgeoning tourism industry continues to supplant forestry as the main economic activity, there will likely be more stable migration patterns. As the Whistler resort becomes more of an all-season resort, there should be reduced seasonal variation in the resident population. The projection is for strong, sustained growth for this region, with the population almost doubling in 30 years.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year

1 General Economy

Mining, tourism and forestry are all important contributors to the economy in this region. In the forest sector, the decrease to the Allowable Annual Cut (AAC) of the Cassiar Timber Supply Area will likely not impact the population greatly. Rising metal prices may lead to more mining activity in the area.

In the mineral sector, the plant at Cassiar which was test processing magnesium burnt down in late 2000 and is unlikely to be rebuilt in the area. There are several mining prospects in the area, but the Golden Bear Mine (between Telegraph Creek and Dease Lake) ceased mining in 2000 except for seasonal heap-leaching.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

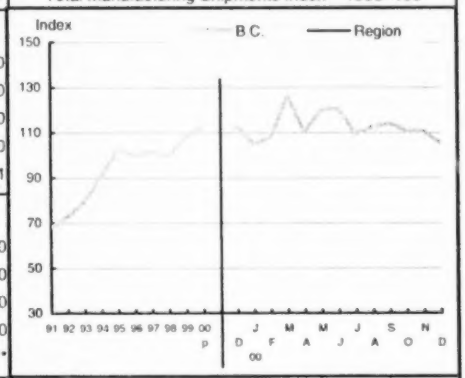
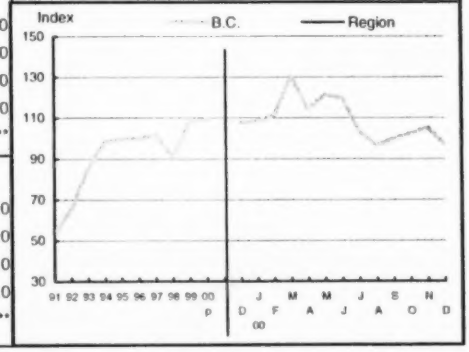
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

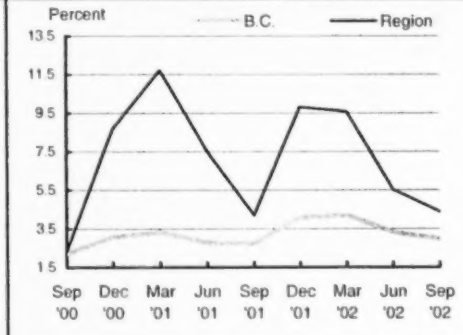
EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996. - Data too small to release.

Source: Human Resources Development Canada and BC STATS population estimates.

12 Dependence on Basic BC Benefits and/or Employment Insurance

(Basic BC Benefits Recipients + Employment Insurance Recipients in Subject Group as a percent of Reference Group)

		All (19-64)	Young Adults (19-24)	'Mid' Group (25-54)	'Older' Group (55-64)
Subject Group (receiving assistance) / Reference Group		Total Pop. 19-64	Total Pop. 19-24	Total Pop. 25-54	Total Pop. 55-64
Stikine Regional District	Sep '00	4.4	8.2	4.3	-
	Dec '00	10.9	17.0	10.8	8.3
	Mar '01	13.7	19.4	14.1	9.6
	Jun '01	10.0	9.7	11.1	6.3
	Sep '01	6.2	-	6.9	5.0
	Dec '01	11.8	11.8	12.5	9.0

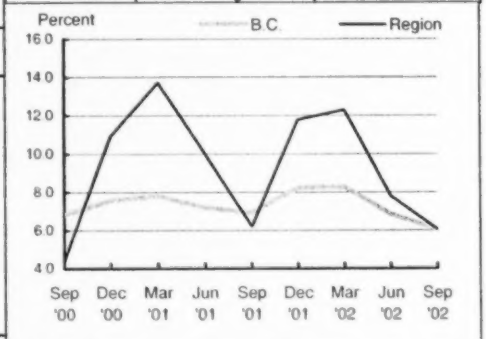
*Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Stikine
Region

13 Demographics

This area is sparsely populated and this results in rather erratic demographic statistics. However, the remoteness of the area means that the age structure of the population is consistently younger than that of the province as a whole. The median age tends to be lower than the provincial median, and the ratio of elderly (aged 65 and over) to working age population (aged 18 to 64) is lower than the ratio for the province as a whole. As well, the gender ratio is weighted in favour of males, in contrast to the province as a whole.

14 Projection

The slow down in the forestry industry will likely extend the trend of out-migration for the near future and the decrease in the AAC may eventually lead to population declines for this area. Births should continue to exceed deaths, boosting the rate of population growth for the duration of the projection period.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

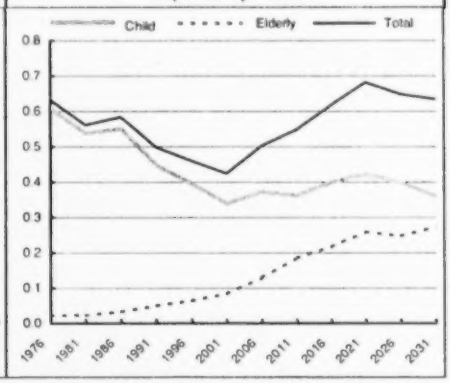
Dependency Ratios



Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Gibsons, Sechelt, Sechelt Indian Government District

Forestry is the main economic driver for this area, with two large processing facilities at Port Mellon, and considerable employment in harvesting throughout the region. As well, the proximity to Vancouver, combined with relatively inexpensive housing, helps draw retirees to the area.

There are plans to upgrade the ferry transportation to this region, which will make the area more accessible and could lead to further population growth. As the baby boom generation reaches retirement, this region could experience increased population growth.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca.

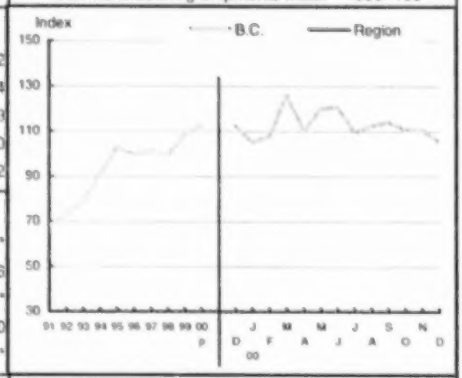
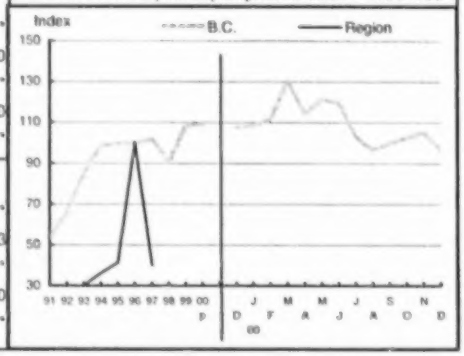
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

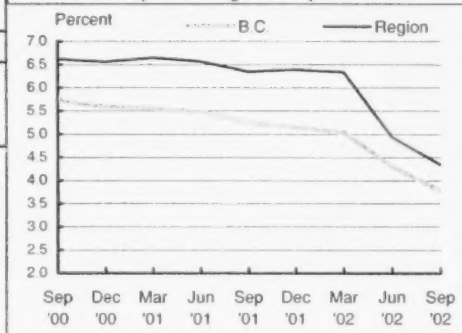
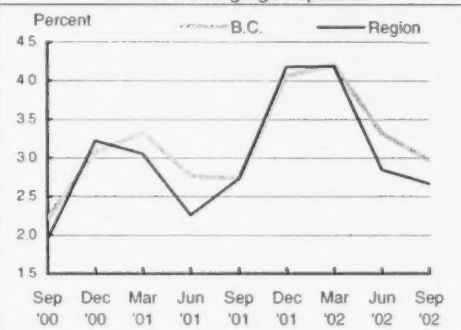
	Region	B.C.
Total Number of Recipients	935	134,102
Percent Distribution by Duration		
<1 Year	34.9	33.3
1-2 Years	17.8	18.9
>2 Years	47.3	47.8

All* Basic BC Benefits Recipients as % of Total Pop 0-64: Region Compared to B.C.



EI Beneficiaries Aged 19-64 as % of Working Age Population



Source: Ministry of Human Resources Administrative Files and BC STATS population estimates. These figures include only a subset of total BC Benefits. Included are Youth works, Welfare to Work, and Age 60-64. Excluded are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include Aboriginal people living on reserve. This definition is identical to the one used in the BC STATS reports on IA Recipients prior to 1996.

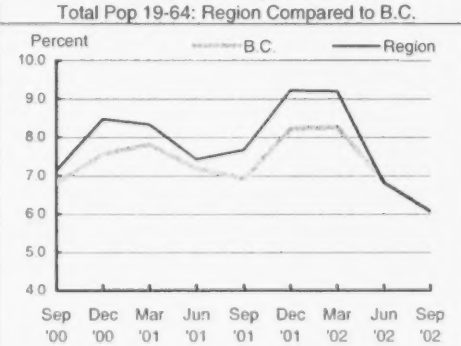
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Prior to June '97, double counting resulted in minor overstatement of this data - see Appendix for details

Sunshine Coast
Regional District

13 Demographics

This area has generally had positive net migration, particularly in the mid-nineties. In the last 25 years the population of the region has more than doubled. Since the region is a popular place to retire, the median age of the population is substantially higher than the provincial median. The ratio of elderly (aged 65 and over) to working age population (aged 18 to 64) is higher than the ratio for British Columbia as a whole. The total fertility rate is slightly lower than the province as a whole.

14 Projection

The proximity to the Lower Mainland and the promise of improvements to the transportation network bode well for population growth in this area. As the baby boom generation reaches retirement, there will likely be increasing inflows of retirees to the area. The projection is for strong, sustained population growth over the term of the projection period.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

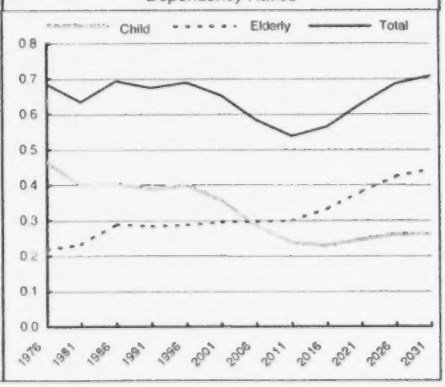
Dependency Ratios



Source: Population data are Projection P-27, run in Summer 2002. Figures are adjusted for Census undercount and are for July 1st of stated year

1 General Economy

Municipalities in Regional District: Ashcroft, Cache Creek, Chase, Clinton, Kamloops, Logan Lake, Lytton, Merritt

Forestry is the main economic driver for this region, particularly in the North Thompson area. In the Kamloops area, mining is another important economic activity. There are two major mines currently operating in the area. The Highland Valley mine at Logan Lake is the largest in the province, employing over 1,000 people. The Blackdome mine near Clinton reopened in 1998 after being closed for seven years, but has since shut down once again due to low gold prices. The mine will likely reopen once prices improve.

A development that will have a substantial impact on the population of this region will be the closure of the Highland Valley Mines. The large number of employees at this mine will mean significant population impacts following closure. The mine is scheduled to close sometime around 2009.

The notes above and later in this report on Demographics and Projections are the basis for BC STATS population projection P27 completed in the Summer of 2002. The projections are updated annually to reflect known demographic shifts and economic conditions. Full projections with "Components of Change", "Special Age Groups", "5 Year Age Cohorts by Sex", and accompanying notes are available for B.C., the 8 development regions, the 28 regional districts, the 79 local health areas (LHAs) and a number of "special areas" of local interest which are not part of a province-wide geocoding system. Individual areas are priced at $5 each with a minimum $25 charge for fax or email delivery. Users may self-serve from our site (VISA or MC) and avoid the minimum charge. Paper copies of all LHAs cost $150 and all regional districts are $80. The full B.C. level projection and summaries of the region projections are available free on our Web site: http://www.bcstats.gov.bc.ca

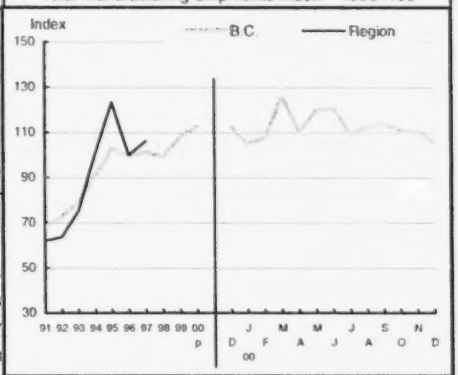
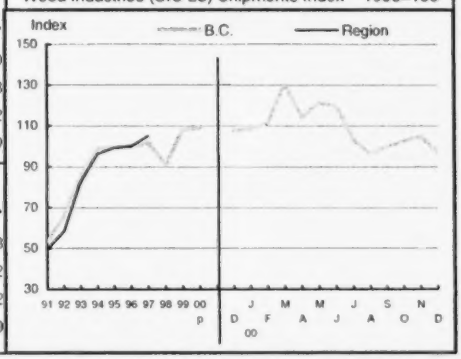
Total Manufacturing Shipments Index 1996=100



Wood Industries (SIC 25) Shipments Index 1996=100



Source: Statistics Canada, unpublished data for regional principal statistics and CANSIM for recent annual & monthly shipments - see appendix.
Note: Charted data joins published points; on charts where intervening data is suppressed line joins only publishable points.
Reporting Period: Any fiscal year ending not earlier than April 1 of the reference year and not later than March 31 of the following year.
Establishment: The smallest operating unit capable of reporting specified input and output data - usually a plant or mill.
Value of Shipment of Goods of Own Manufacture: Net selling value of goods made by reporting establishment, or for its account, from its materials.
Employees: Respondents are asked for average month-end employment.
Wages and Salaries: Wages and salaries are shown before deductions for income tax and employee portion of employee benefits and include payments for regular work, overtime, and paid leave as well as bonuses and commissions paid to regular employees.

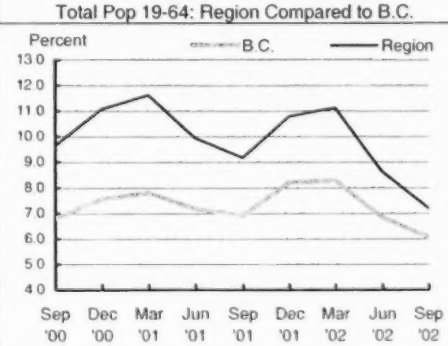
All 'Safety Net' Recipients as % of Total Pop 19-64: Region Compared to B.C.



Thompson-Nicola
Regional District

13 Demographics

Like many regions in British Columbia with a high dependence on the resource sectors, this region experienced net migration outflows through the mid-eighties. Since that time, the population has been steadily growing. The gender ratio in this area is biased in favour of males, in contrast to the province as a whole where there are more females than males. The reason for this is the region's dependence on the male-dominated resource sector jobs.

14 Projection

The closure of the Highland Valley Mines will have an effect on the population of this area, reducing migration inflows to the region for several years. However, the diversity of the region's economy will ensure that the net migration will remain positive and strong. The projection is for this region to continue to experience strong population growth throughout the projection period.

15 Selected Demographic Characteristics

Year	Population by age group, Thousands of persons							House-holds	Dependency Ratios			Year
	0-4	5-17	18-24	25-44	45-64	65+	All Ages	(,000)	Child	Elderly	Total

Appendix - Notes to Data Tables

Geography

This report is organized by geographic region. British Columbia comprises eight **development regions**, which in turn are composed of varying numbers of **regional districts**. The same set of data tables are presented for: the province of British Columbia; each development region, sorted in numeric order according to the code number, and; each regional district, sorted in alphabetic order.

Regional districts are generally equivalent to Statistics Canada's (SC's) census divisions. Readers are cautioned that regional district boundaries are sometimes subject to change. Langley City and Langley District Municipality were transferred to Greater Vancouver Regional District from Central Fraser Valley Regional District in 1989. Peace River-Liard Regional District has been split into Peace River Regional District and Fort Nelson-Liard Regional District. This report now publishes data for the two new northern RDs. The data for the old Peace River-Liard RD will be the same as for Northeast Development Region. In the Spring of 1999 the name of Fort Nelson-Liard RD changed to Norther Rockies RD.

In 1995, a number of changes occurred in the lower mainland: the municipalities of Maple Ridge and Pitt Meadows were moved from Dewdney-Alouette RD into the Greater Vancouver RD. In January 1996, the remnants of Dewdney-Alouette RD amalgamated with the remnants of the Central Fraser Valley RD (Abbotsford and Matsqui) and the Fraser-Cheam RD to form Fraser Valley RD. While this report is organized according to the new boundaries in the Fraser valley, Tables 5 and 8 within RDs 9, and 15 are presented on the basis of add-ups of the most substantial pieces of the former jurisdictions and Table 6 incorporates a noted break in the series.

The list below shows the relationship of regional districts to development regions. The associated census division number is provided for each regional district.

DR 1: Vancouver Island/Coast
- 23 Alberni-Clayoquot
- 17 Capital
- 45 Central Coast
- 25 Comox-Strathcona
- 19 Cowichan Valley
- 43 Mount Waddington
- 21 Nanaimo
- 27 Powell River

DR 2: Mainland/Southwest
- 09 Fraser Valley
- 15 Greater Vancouver
- 31 Squamish-Lillooet
- 29 Sunshine Coast

DR 3: Thompson/Okanagan
- 35 Central Okanagan
- 39 Columbia-Shuswap
- 37 North Okanagan
- 07 Okanagan-Similkameen
- 33 Thompson-Nicola

DR 4: Kootenay
- 03 Central Kootenay
- 01 East Kootenay
- 05 Kootenay Boundary

DR 5: Cariboo
- 41 Cariboo
- 53 Fraser-Fort George

DR 6: North Coast
- 49 Kitimat-Stikine
- 47 Skeena-Queen Charlotte

DR 7: Nechako
- 51 Bulkley-Nechako
- 57 Stikine

DR 8: Northeast
- 55 Peace River
- 59 Northern Rockies

Appendix - Notes to Data Tables

Table 2: Economic Structure

This table is based on SC's **Business Register**, the central database which is used to frame all their business surveys. This database identifies business **establishments**, which are normally company locations or plants that are able to separately report basic financial statistics. For further information on the definition of an establishment, interested readers are referred to SC's *North American Industry Classification System (Canada 1997)* manual, catalogue 12-501.

Changes to the Business Register in recent years have broadened the coverage of the file. A new 'indeterminate' category of employment size includes sole proprietorships and those firms without paid employment.

Table 3: Employment and unemployment rate (LFS)

The data for this table comes from the Labour Force Survey (LFS) by Statistics Canada. The series presented here are three-month moving average, actual. This presentation minimizes the volatility inherent in small samples and sample rotation. Data are only available for BC, development regions and the Census Metropolitan Areas (CMA) of Vancouver and Victoria. Vancouver CMA is identical to the 1996 Census boundaries of Greater Vancouver Regional District. Victoria CMA is equivalent to Capital Regional District **less** Subdivision A (the Gulf Islands) and Subdivision D (Port Renfrew) and the Indian Reserves associated with these areas.

Table 4: Retail Sales

We publish SC figures for British Columbia and Vancouver Census Metropolitan Area and calculate the difference as "Rest of Province". Since the new boundaries for Greater Vancouver Regional District coincide with the Vancouver CMA boundaries, the GVRD data in *QRS* is for the new RD boundaries.

SC publishes estimates of monthly and quarterly retail sales for each province by up to 16 **retail trade groups**. This estimate includes only retail sales by firms that are SIC (Standard Industrial Classification) coded to **major group 60, Retail Trade**. The province and Greater Vancouver retail trade totals used in this report are these published numbers, based on the **monthly survey**. The annual survey results differ from the monthly estimates and are not used in this report.

Table 5: Manufacturing Principal Statistics

This table provides selected **principal statistics** based on surveys conducted by SC. Similar sub-provincial data was published by SC in the catalogued publication 31-209 up to and including the 1986 reference year. SC has now released for publication principal statistics for 1992. We have suppressed data where there is the possibility of disclosure of confidential information. There are some differences in the detail of information available to *BC STATS* and to SC. In addition, the suppression preferrences chosen, at our request, have worked against some of the data that *QRS* chooses to publish. More specific industry detail is preserved at the expense of major group roll-ups. This has resulted in the complete suppression of six regional districts and hence the four development regions that include them for the 1992 year and later. As the sub-provincial data is available on an annual basis only, it is supplemented by annual and monthly shipments for the same industries at the provincial level. Monthly shipment data are published in SC 31-001 and, in more detail on CANSIM, which is the

Appendix - Notes to Data Tables

electronic data base we used to update the series:

D315351 - Canada, total, all manufact'ing
D315497 - Canada, wood industries
D321241 - B.C., total, all manufacturing
D321243 - B.C., food industries
D321387 - B.C., wood industries
D321390 - B.C., sawmill & planing mill
D321431 - B.C., fabricated metal products

Table 6: Building Permits

SC collects building permit data from municipal and regional district offices. Data for many rural areas is incomplete or non-existent. Further, not all building projects require a building permit, and not all projects with a permit proceed or are completed.

As in other series, when at least six months data are available for the current year, a projection of the annual total is provided. However, as non-residential permits are subject to wide variation, projections of industrial, commercial, and institutional & government permits are limited to 130% of the current year-to-date value whenever the current year-to-date figure is more than double the figure for the same period in the previous year. The 130% ceiling has been arbitrarily chosen as suitable when data for six months remain to be released in the current year. As the end of the year is approached a lower ceiling is appropriate. The ceiling is reduced 5% per month as the number of months remaining until the end of the year decreases.

Table 7: Tourism Room Revenue

This table is intended to measure **tourism activity** but includes business travel and other uses of accommodation. The data is based on remittances of hotel room tax to the Ministry of Finance and Corporate Relations. Not all accommodation activity is measured as the statutory requirement is that the tax must be remitted when the establishment has four or more rooms, and no tax is required for a duration of stay of at least one month. This has the effect of excluding many **bed and breakfasts** and **residential hotels**.

Table 8: Incorporations

Tables 8 and 9 are intended to provide an indication of business formation and failure.

Data on incorporations comes from the Ministry of Finance and Corporations. The weakness on the formation side is the failure to include partnerships, extra-provincially incorporated companies, and new sole proprietorship business ventures.

Table 9: Business and Consumer Bankruptcies

We receive bankruptcy data from the Office of the Superintendent of Bankruptcy, Government of Canada, Ottawa. The data are geographically coded to urban centres where appropriate and the balance to a 'non-urban' category. Data for Vancouver and Victoria are for the Census Metropolitan Areas.

Bankruptcy is an extreme form of business failure. Most unsuccessful businesses simply wind down and cease operations. While the level of these series may be of questionable value, the charted region vs. province comparison does provide some useful information.

Table 10: BC Benefits

The **basic BC Benefits** caseload is used to generate recipient data by age and family structure. The BC Benefit program replaced the Income Assistance program in 1996. We have chosen recipient groups that match the

Appendix - Notes to Data Tables

previously published Income Assistance data to achieve continuity.These figures include only a subset of total BC Benefits. INCLUDED are Youth Works, Welfare to Work, and Age 60-64. EXCLUDED are Disabled Persons, Children in the Home of a Relative, and OAS/Seniors. A recipient is defined in these reports as 'each person living in a family or living alone that is receiving basic BC Benefits'. Data does not include aboriginal people living on reserve. A dash '-' identifies data too small to release.

Table 11: Unemployment

Measures of regional unemployment are only available historically for nine **economic regions** defined by SC. Starting with January, 1995, the **Labour Force Survey** (LFS) is compiled for the eight development regions defined by the provincial government. The LFS samples appropriately in these regions to derive local measures of unemployment. As a proxy for small area unemployment rates, *BC STATS*, using data from Human Resources Development Canada (HRD), estimates the ratio of Employment Insurance beneficiaries as a percent of the working age population in a region. (See also, Table 2)

Table 12: Basic BC Benefits and/or Employment Insurance

The data described for tables 10 and 11 are combined to provide a more complete picture of regional reliance on the "safety net."

Beginning in June 1997, the combined BC Benefit+EI rate in this report has been adjusted to count only once those persons receiving both Employment Insurance and BC Benefits. Therefore use caution when comparing data to pre June 1997 data. This adjustment resulted in an overall decrease of 0.3 percentage points to the BC rate in June 1997.

Table 15: Demographic Characteristics

Population growth can be a measure of the economic well being of an area. *BC STATS* projects population for **local health areas** (approx. 80 in the province) and for **regional districts**. This data is available in considerable detail in print and electronic formats. See the description of regional data products elsewhere in this report.
